

TECHSTAUNCH

Passionate to code YOUR SUCCESS

About us

We build digital products that power businesses. Our focus is the agile development of web, cloud, and mobile applications – and helping organizations create and sustain digital innovation.

We help companies at any stage of the product software development cycle: from R&D and building MVPs from scratch to scaling, UX analyzing and improving.

We enjoy researching, learning and growing with them.

Why ?

PROGRESSIVE TEAM OF TECHNOLOGY EXPERTS
TO DELIVER A SUPREME PRODUCT

We're a global team with insanely high standards

1. Company focus

Our focus is the agile development of web, cloud, and mobile applications - and helping organizations create and sustain digital innovation with minimal development risk. We reduce development risk for our clients by using sprint methodology, user-focused design and standards-based

2. Agile approach

Our approach is fast, flexible, and collaborative. All TechStaunch clients have direct access to our leadership team, plus a designated Product Manager who is responsible for making sure we thoroughly understand client expectations and deliver to them.

3. Process

We create business impact via a proven approach to identify and deliver digital opportunities, using best-in-class

Our Team

20 +
Staunch Experts

we are here to help all companies to
extend & scale their business in
order to compete tomorrow.

What we do?

Web Development

We offer end to end custom web development solutions by strategically combining latest web technologies.

UI/UX Design

TechStaunch is a leading web design agency with a knack of turning great ideas into meaningful interactions.

DevOps

Our DevOps services help optimize operations lifecycle and workflows, software delivery, and time to market.

App Development

We design creative and functional user experience for mobile applications.

API Integration Services

We design custom API's and reduce your development time and cost by integrating

Quality Assurance

We keep Quality Assurance (QA) and software testing services at the core of our ecosystem.

Web Development

App Development

UI/UX Design

How we work

Analysis

This is the first step towards app development process. We hold a meeting with the client before beginning the app development process. We try to know what kind of app, and the exact platform requirements for the client.

Development

We offer development following the ideation set on storyboard.

Design

This is the phase where ideation, designing the prototype and designing

4

QA

We offer testing and quality control services as one of the most important step in app

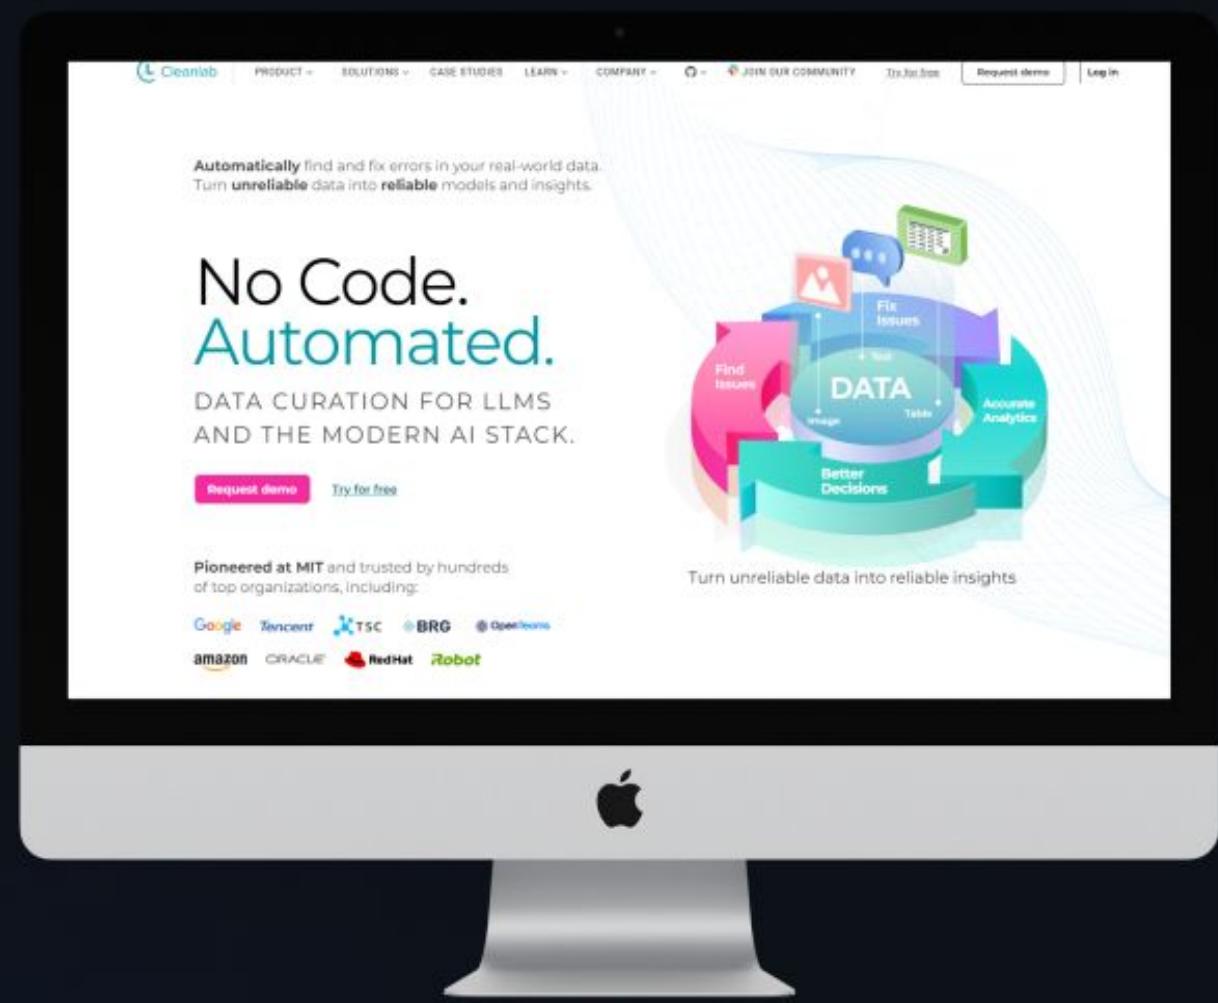

5

Deploy

This is the release step after having tested and performed quality control on the app.

Our Process

Data Curation for LLMs and Modern AI stack

Cleanlab is a website for an AI-based product company. Our client aimed to enhance both the website design and performance. Our responsibility was to improve the existing UI and overall performance in accordance with their requirements.

Technology: React.js, Next.js

- Enhance the current UI
- Optimize the website's performance
- Integrate HubSpot form
- Implement tag-based blog filtering functionality

Pioneered at MIT and trusted by hundreds of top organizations.

Anymoment

Experience Booking Platform

Our client asked us to develop a SaaS solution Marketplace for booking all types of experiences. The task of the TechStaunch team was to create all the primary parts of the project, engineering, design, and documentation.

We delivered a web application & a cross-platform app, reducing time and maintenance costs and reaching as many users as possible.

We studied the target audience's stated needs and applied our research into a cutting-edge experience marketplace app.

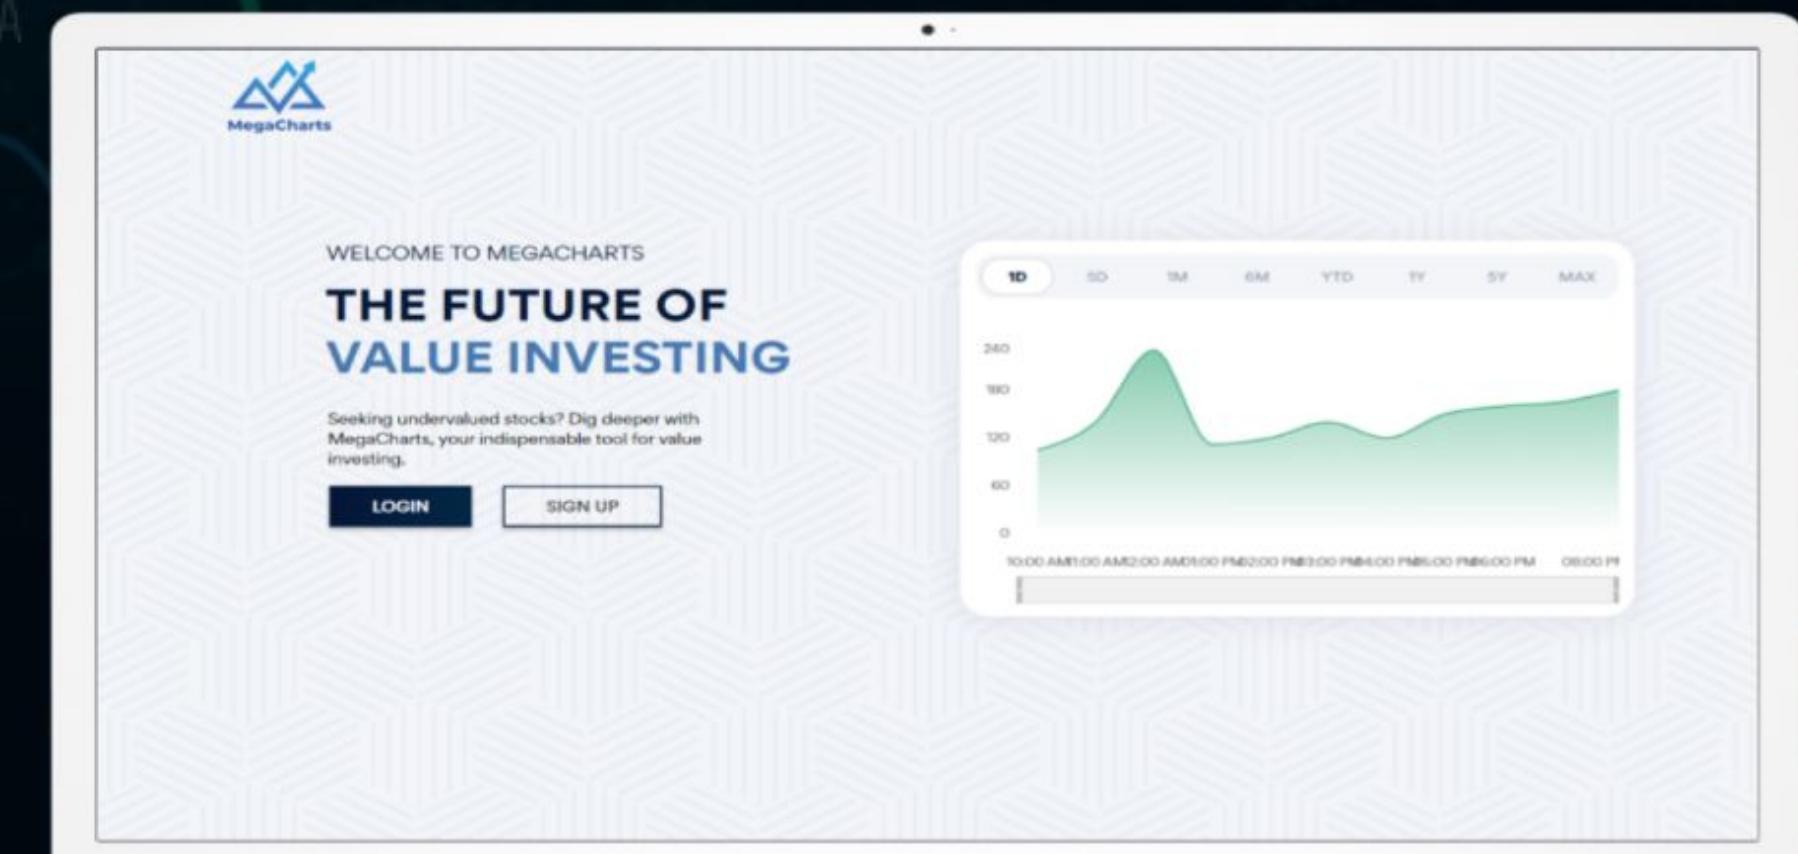

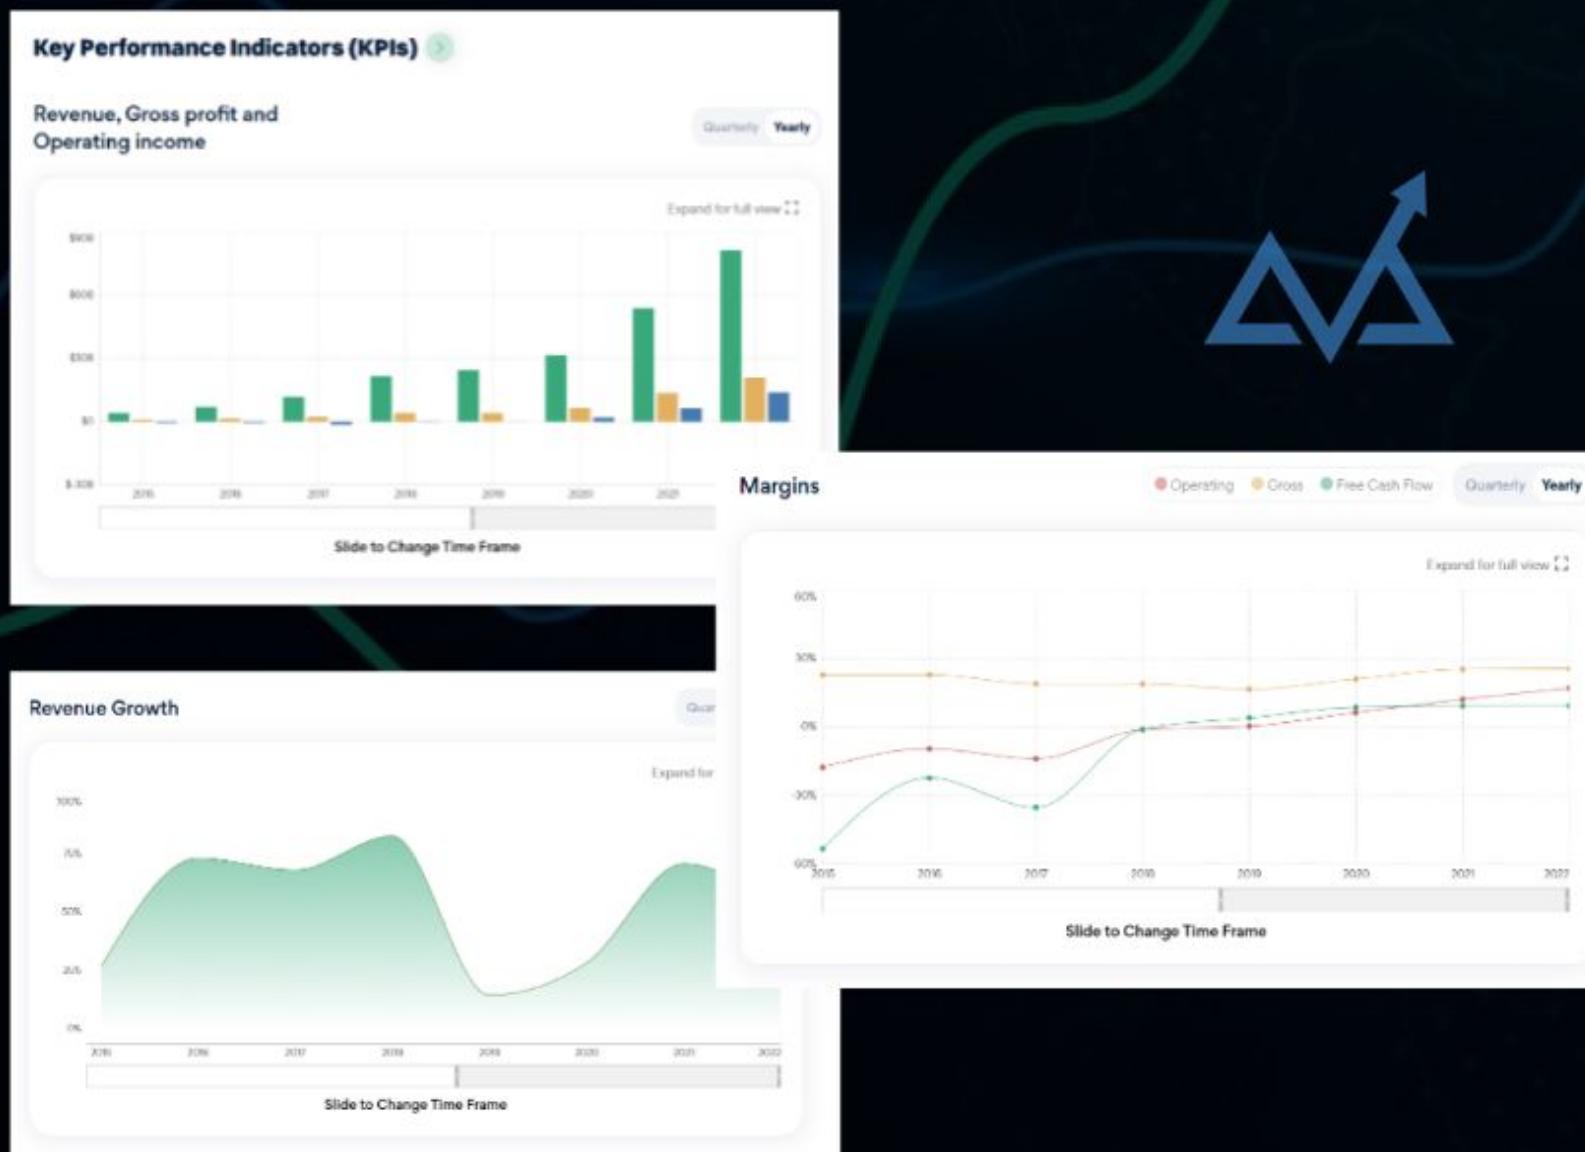

- Add/Edit different types of experiences
- Users identity verification through various third party services
- Set Host availability for experiences and manage bookings through single calendar
- Handle bookings on listed experiences along with automated payments
- Customized admin panel for verification, transactions, approvals and support features
- Completely integrated custom messaging feature for communication between host and customers
- Smooth Wishlisting to checkout process along with customer preferred inputs such as location, date/time, etc
- Live Chat & Support features

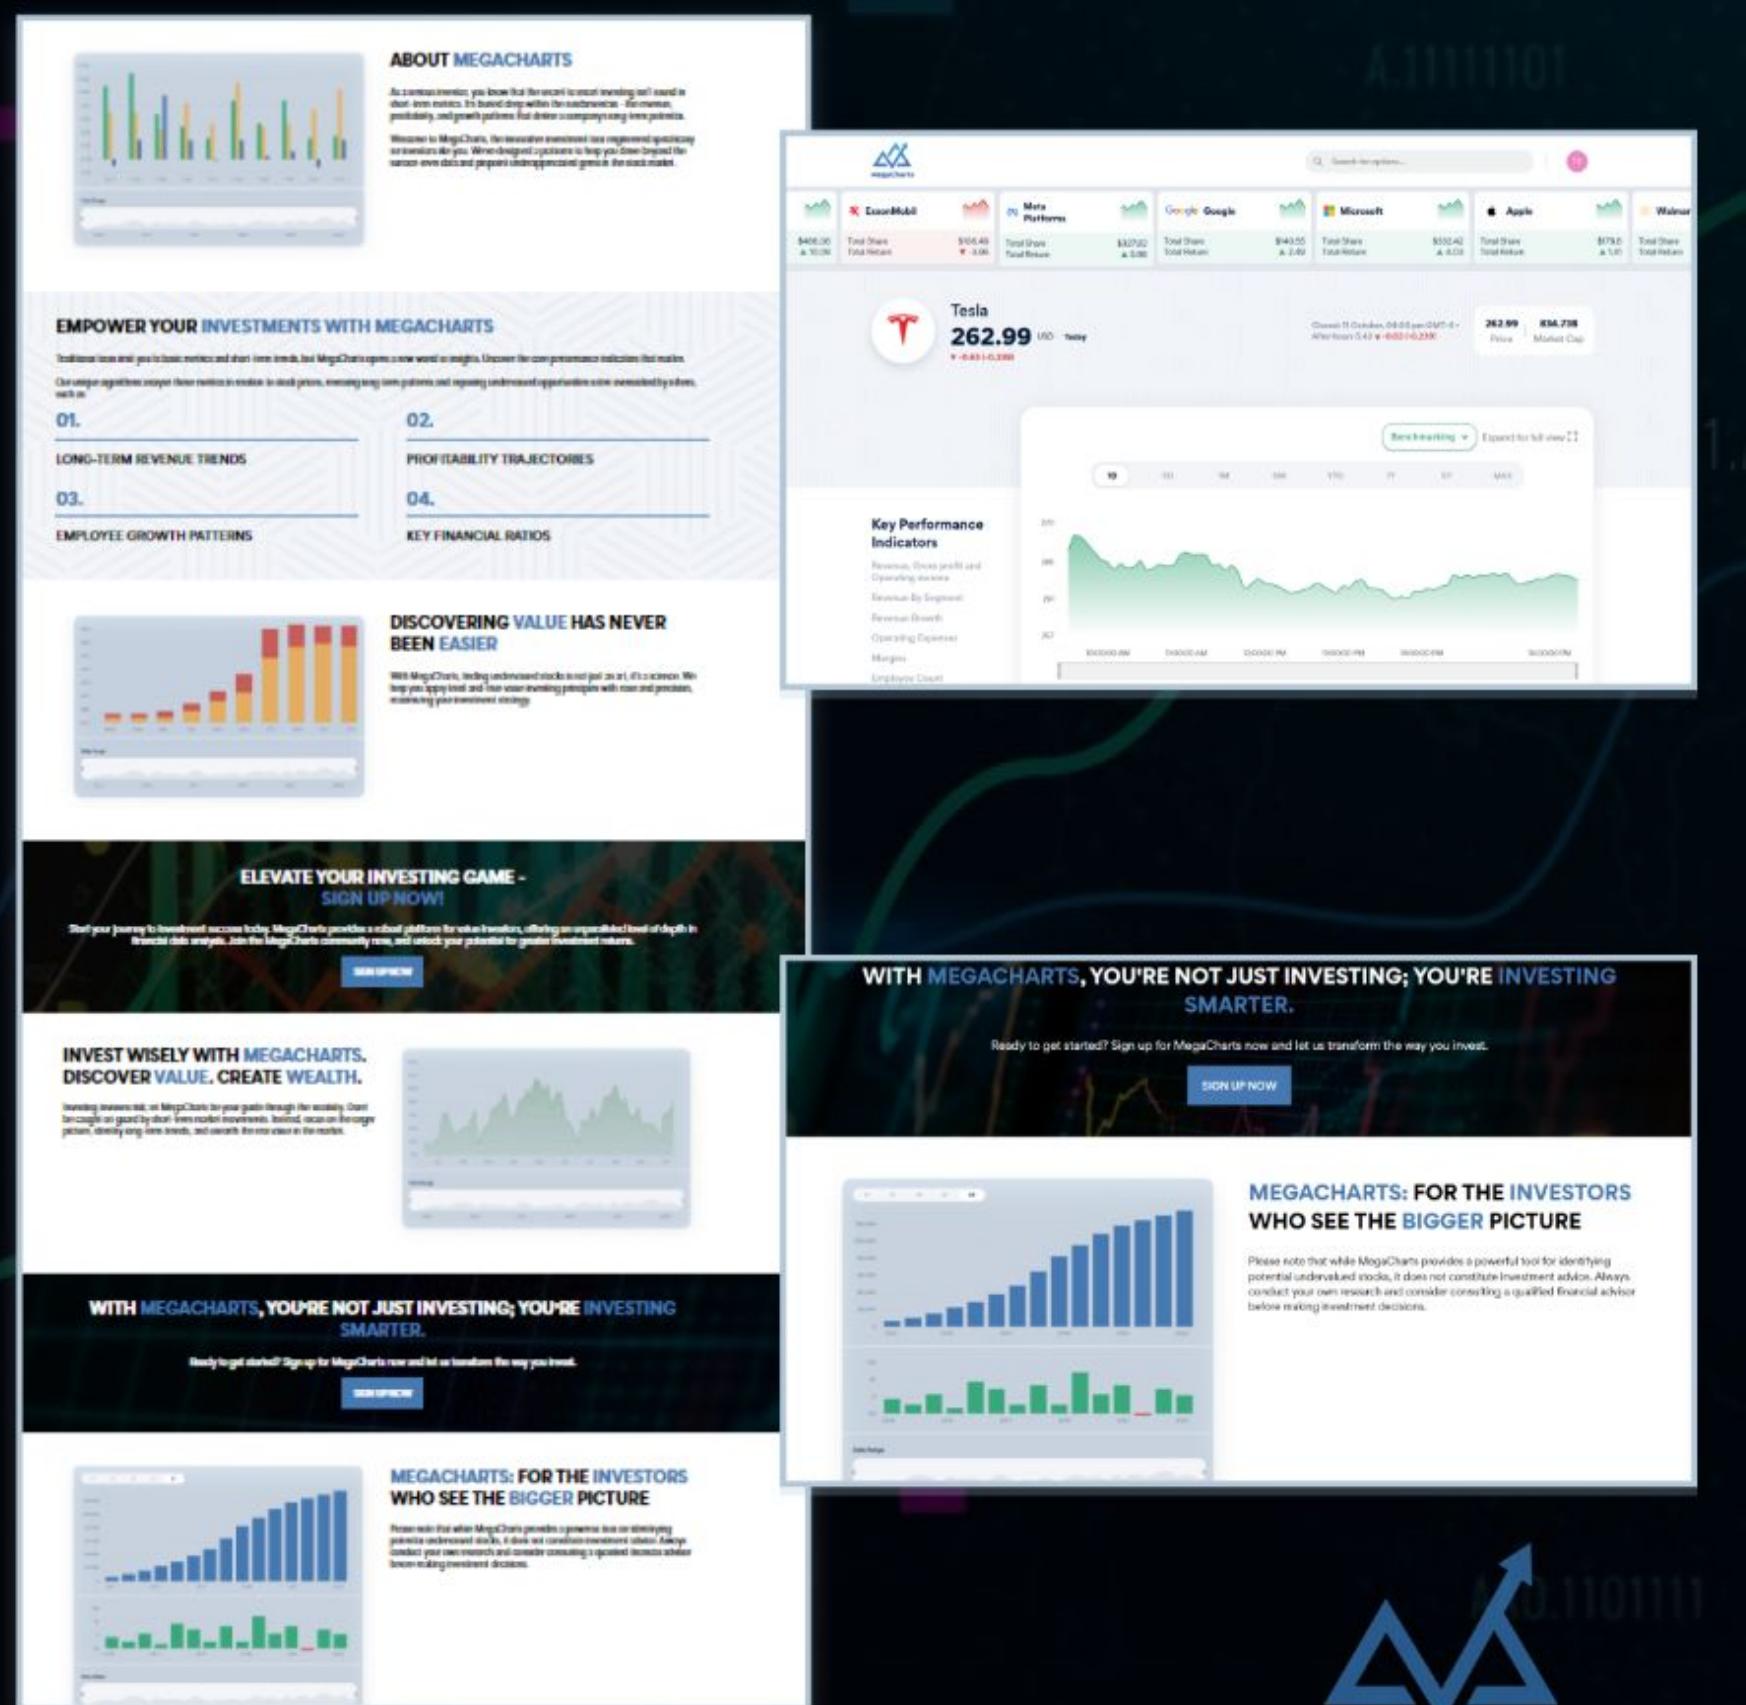

Technology : React.js, Next.js, Trullio Postcoder, Postgres

MegaCharts is the innovative investment tool engineered specifically for investors. We've designed a platform to help investors delve beyond the surface-level data and pinpoint under appreciated gems in the stock market. Unique algorithms and various types of charts have been used to analyze behavior of the stocks.

Technology: React.js, Node.js, Stripe

MegaCharts 
Stock Analysis Platform

- User identity verification through third party services
- Varied web access privileges tailored to specific user types
- Automated subscription payments facilitated through third-party services
- A feature for in-depth analysis, allowing comparison of multiple stocks

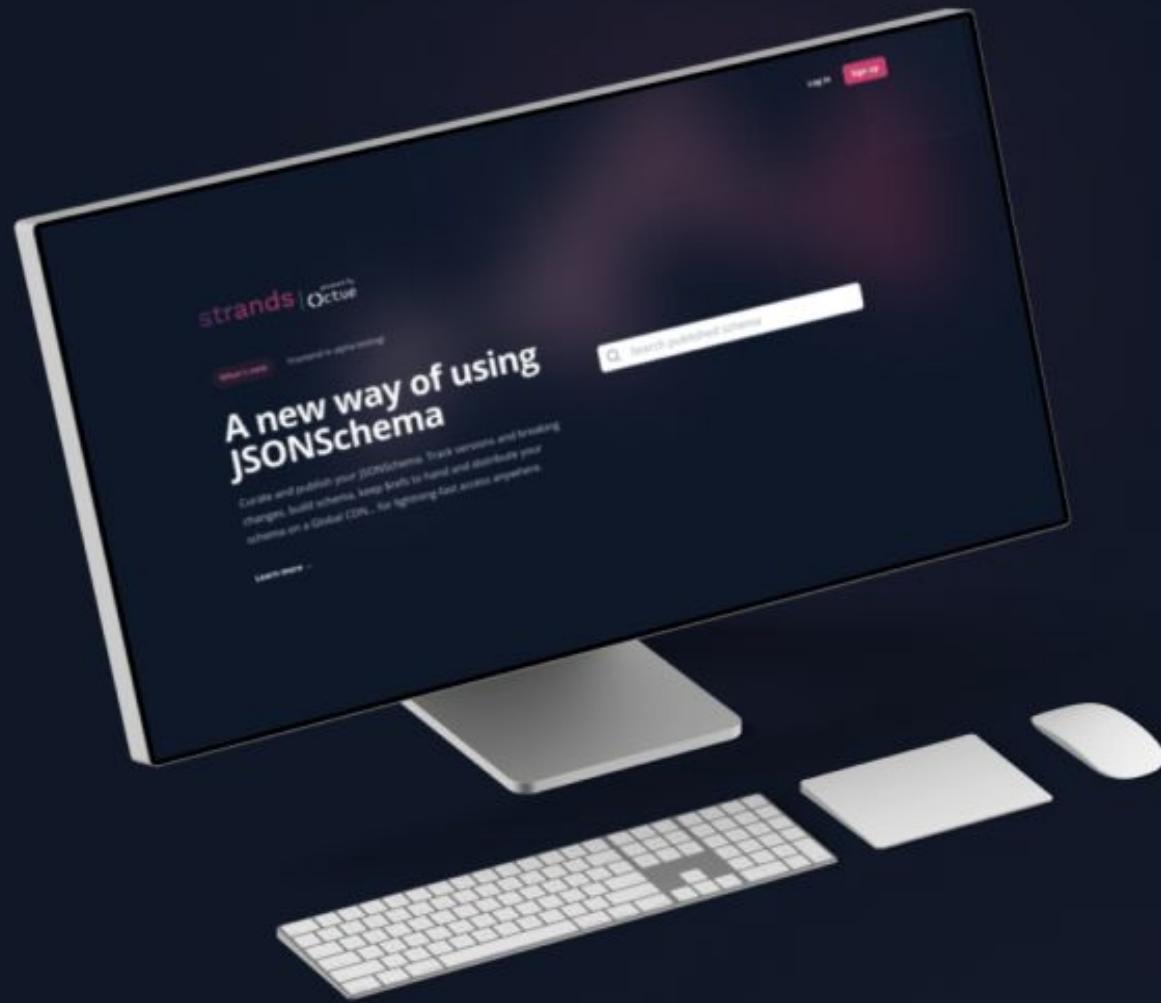

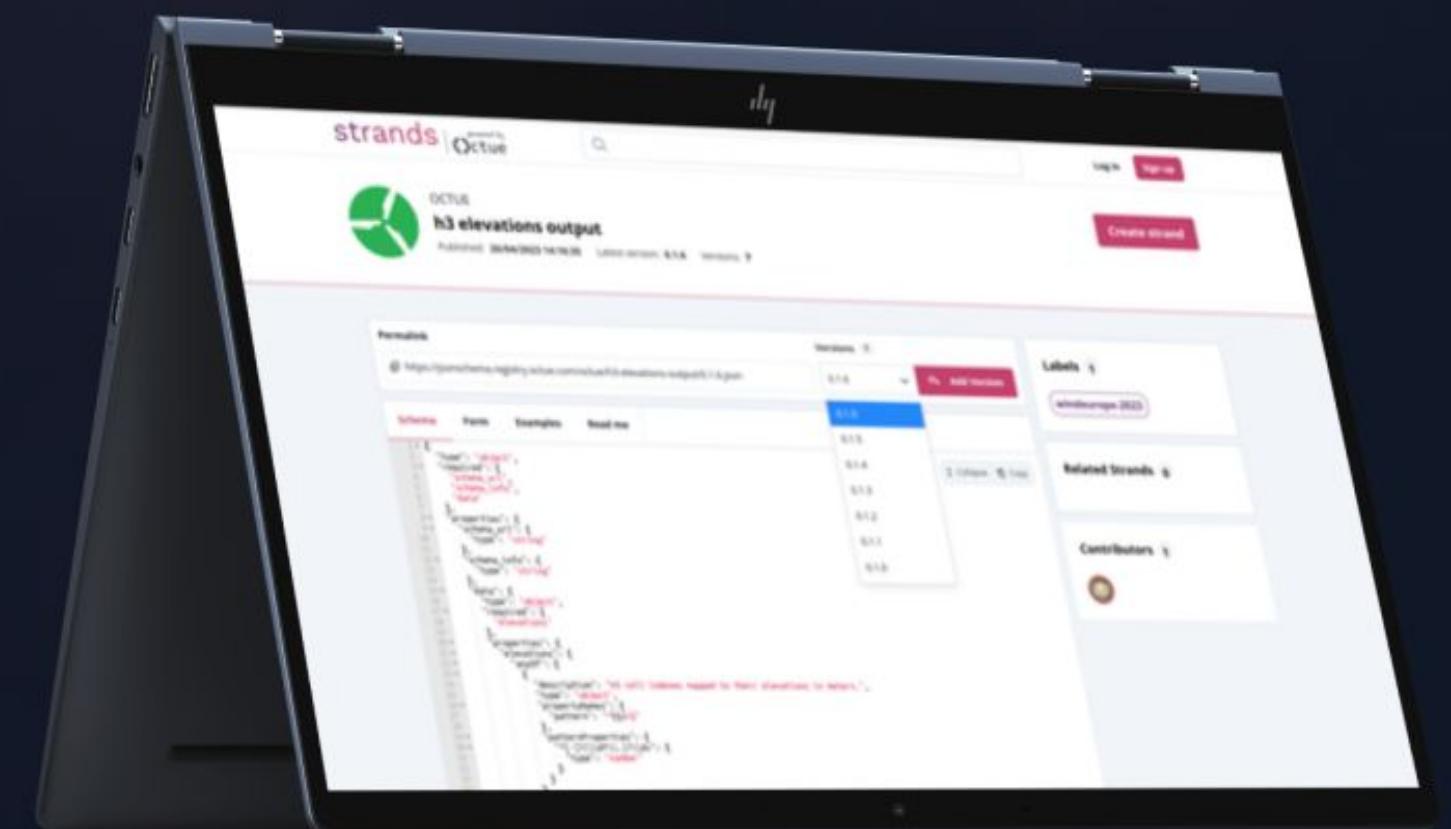

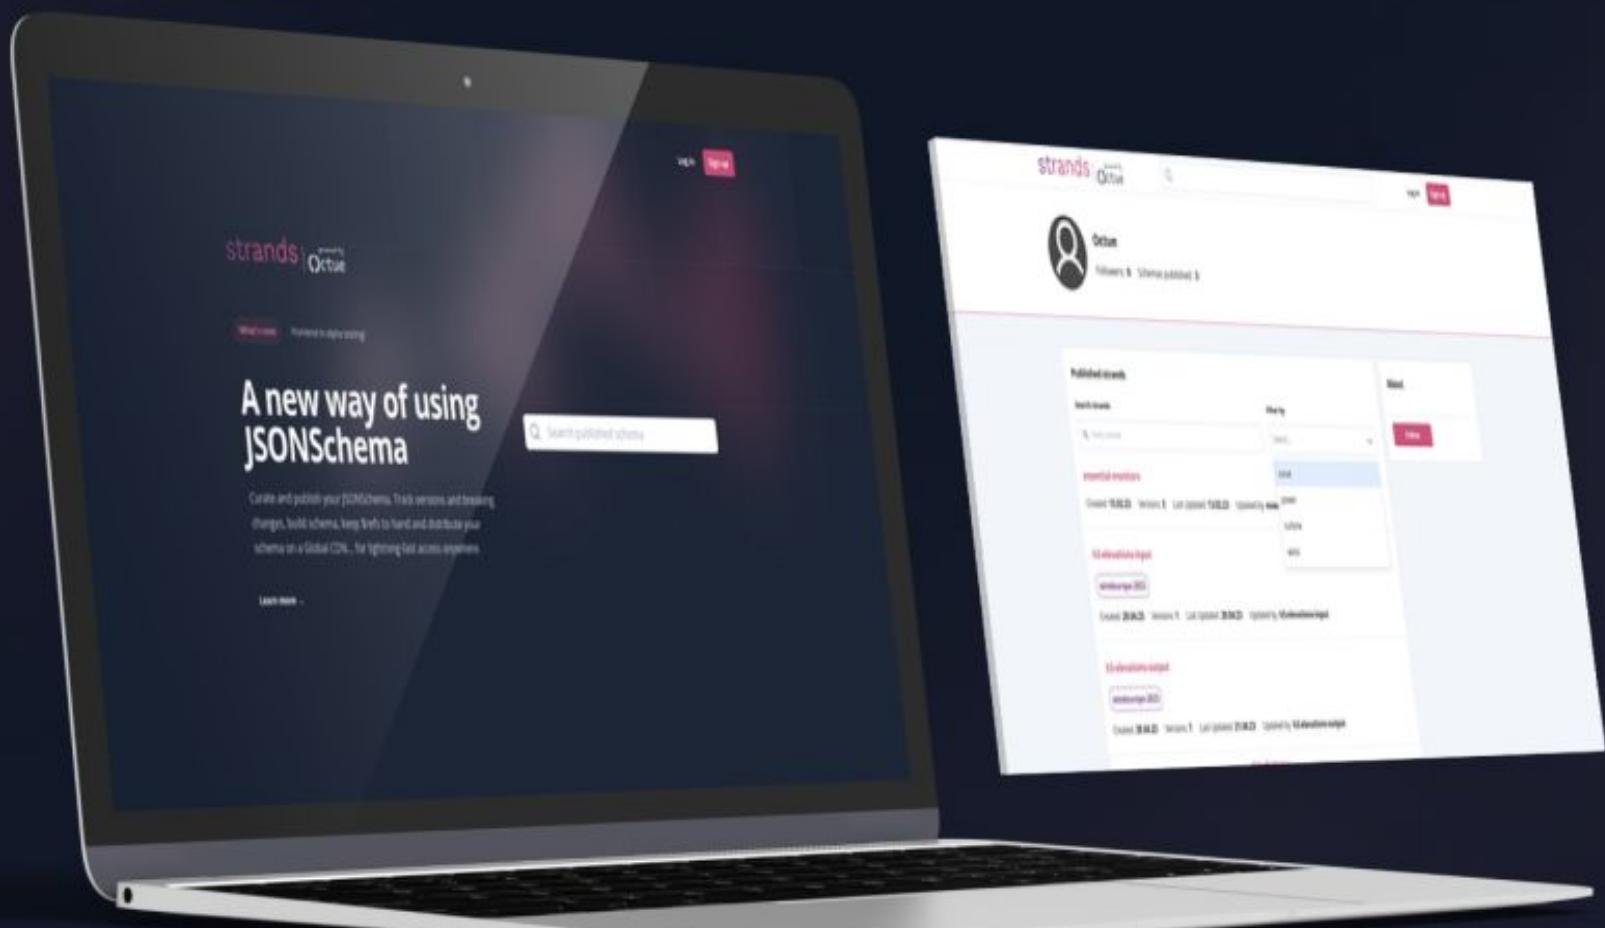

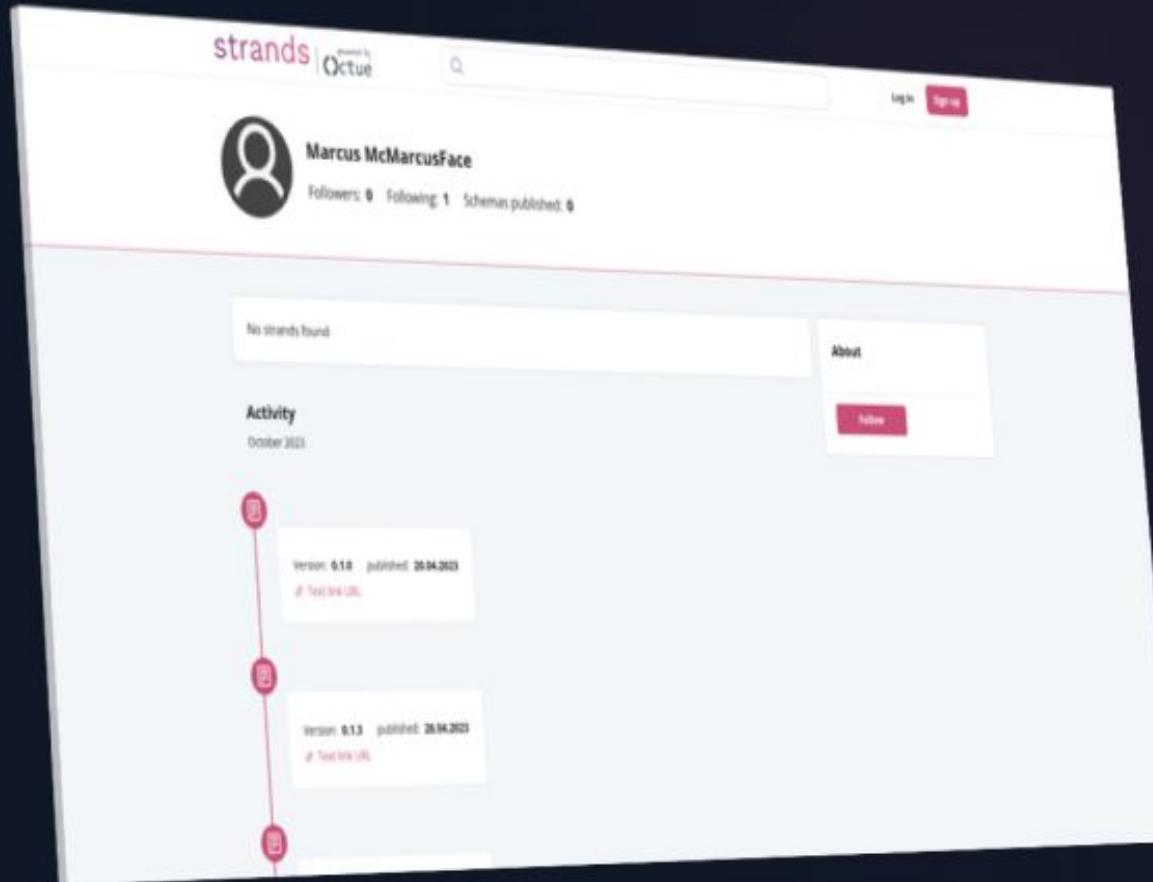

JSON Schema Management Platform

Strands is the platform to publish JSON schema. It keep tracking of versions and manages build schema to distribute it on Global schema. Organizations or Users can maintain their strands and it's versions.

Technology : React.js, Next.js, OAuth

- Create and Update Strands
- Integrate user and team administration capabilities
- Facilitate dynamic listing and advanced search filtering of strands based on user or organization criteria

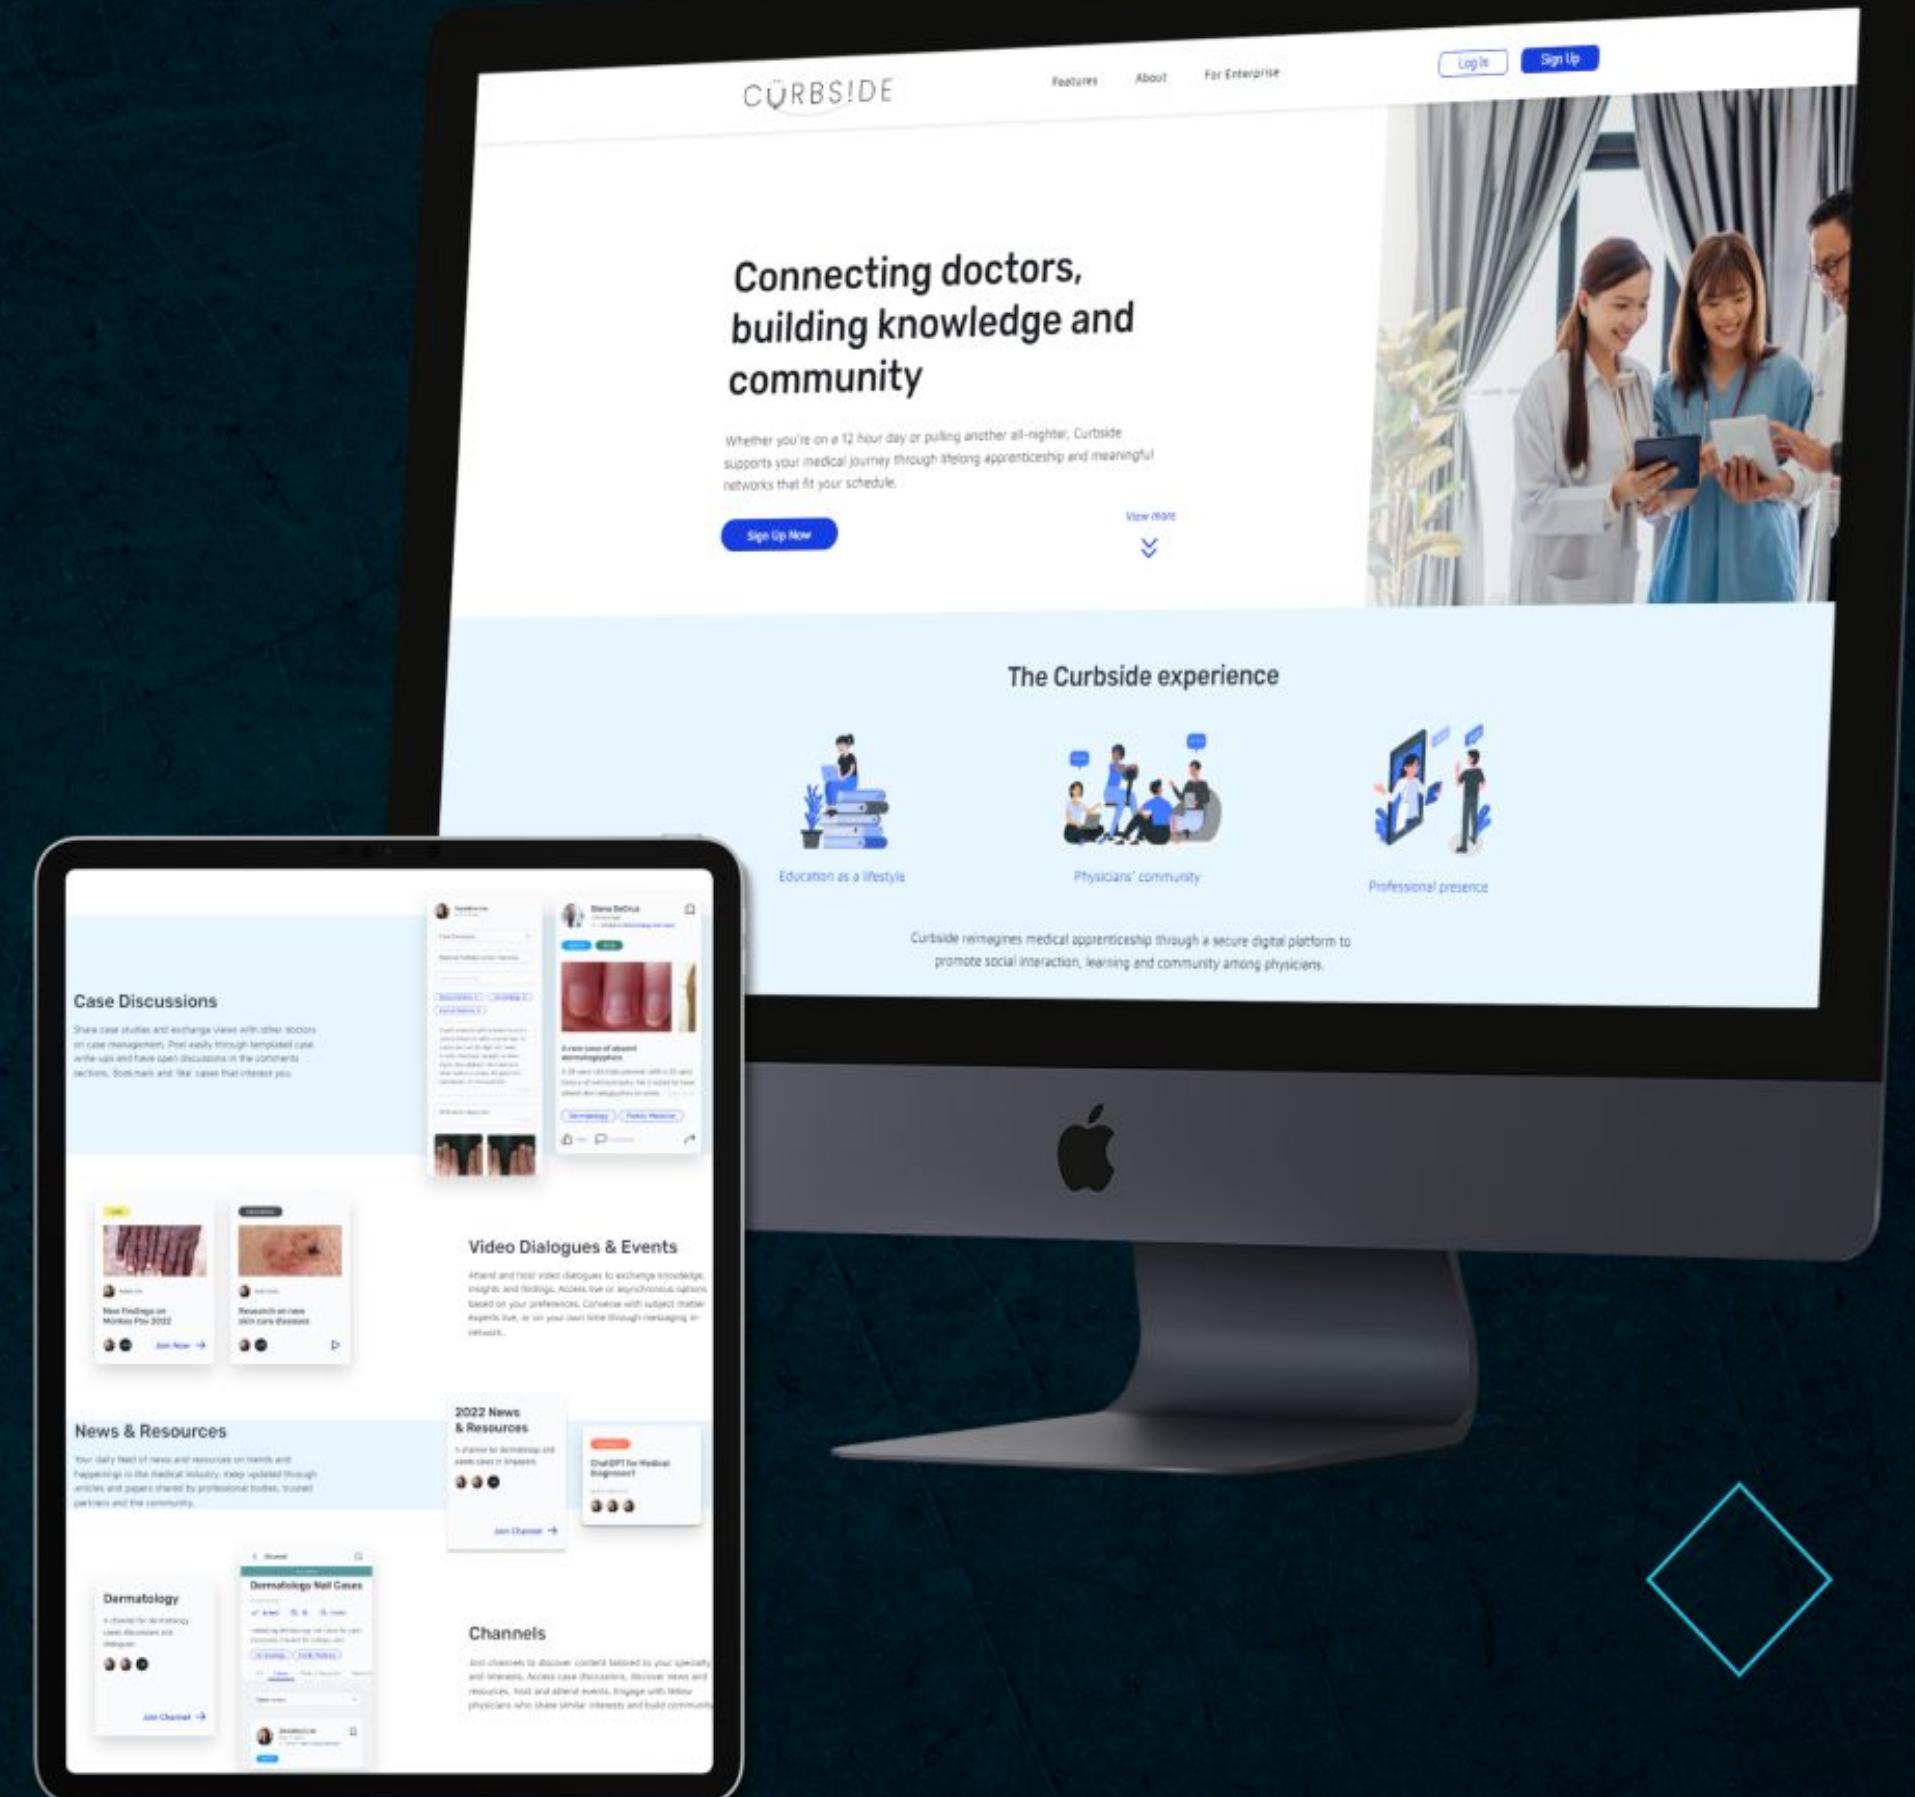

CURBSIDE

Networking Hub for Medical Professionals

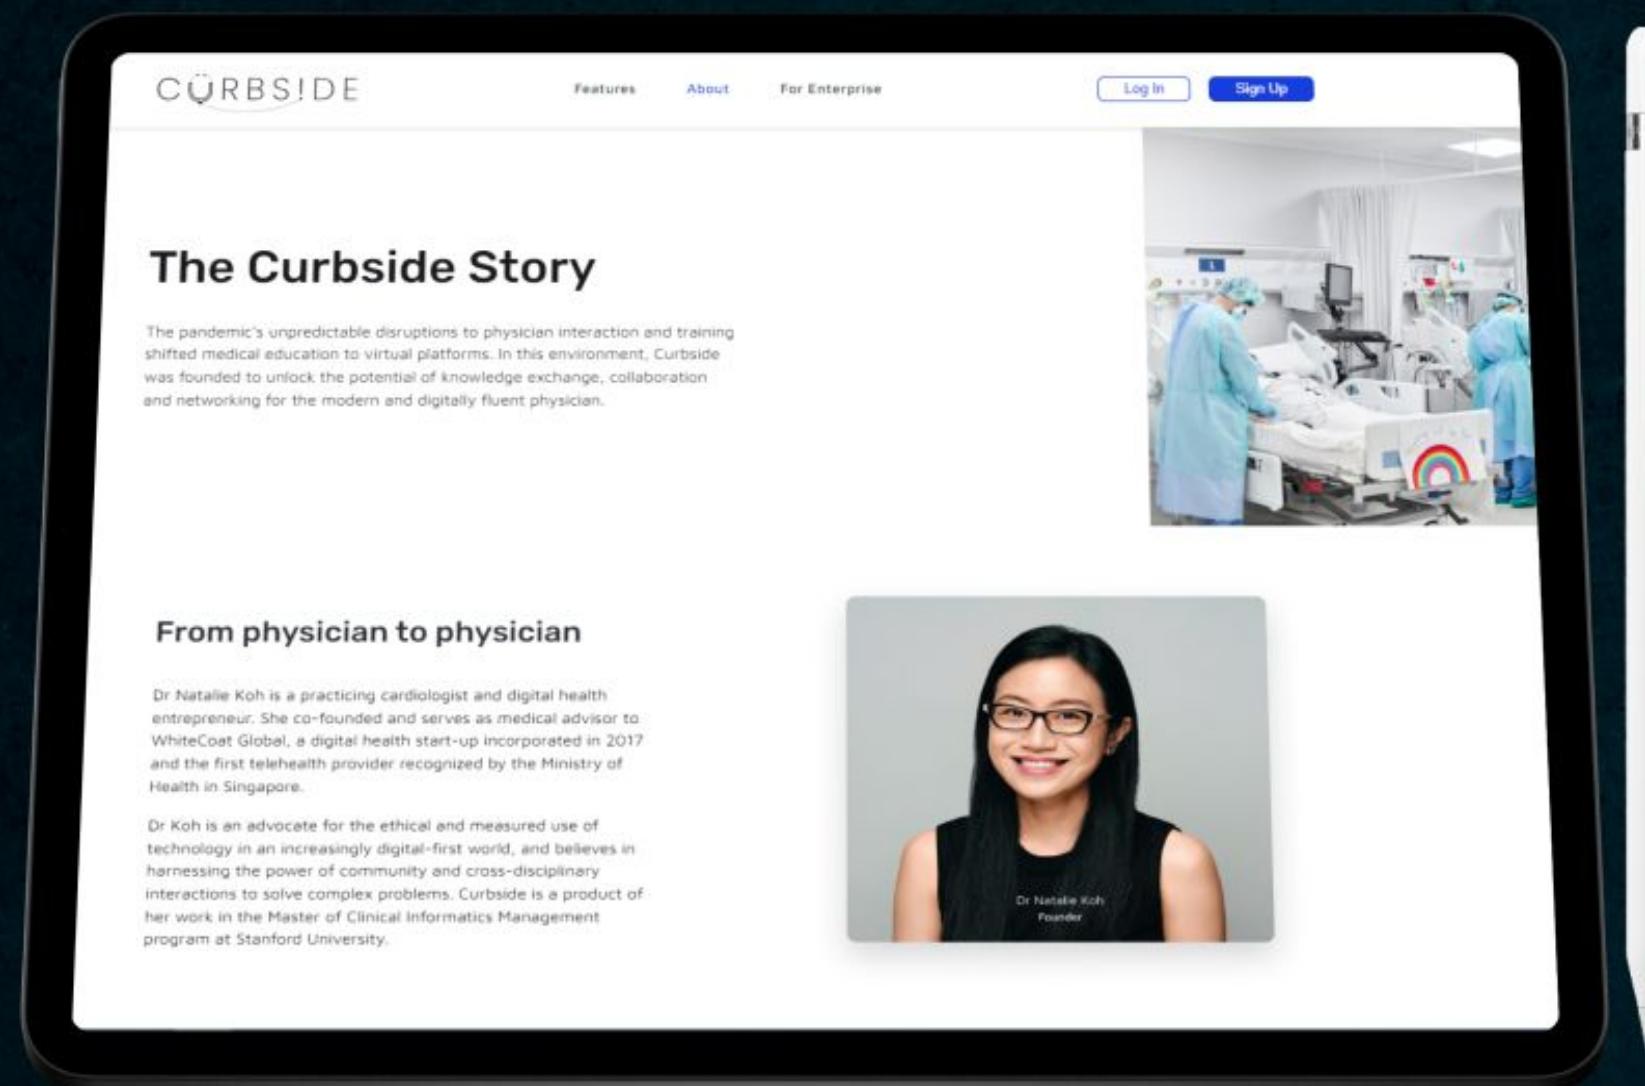

Our client wanted us to develop a platform for physicians to expand their knowledge base and build a professional presence in a secure space. Curbside re imagines medical apprenticeship through a digital platform to promote social interaction, learning, and community among physicians, allowing them to expand their knowledge, build professional networks, collaborate, and stay updated with medical trends at their own pace.

Technology : Next.js, Node.js, Express.js, Postgres

- Built the admin system where everything can be accessed in just one click due to the use of single database
- Posts like Job Openings, Case Discussions, Virtual Dialogues and News & Resources can be hosted

The image displays the Curbside mobile and desktop applications. The mobile app shows a grid of cards for 'Case Discussions' (e.g., 'New Findings on Melasma Pro 2023'), 'Video Dialogues & Events' (e.g., 'ChatGPT for Medical Diagnosis'), 'News & Resources' (e.g., '2023 News & Resources'), and 'Channels' (e.g., 'Dermatology'). The desktop app features a header with 'CURBSIDE', 'Features', 'About', 'For Enterprise', 'Log In', and 'Sign Up' buttons. Below the header is a section titled 'Connecting doctors, building knowledge and community' with a sub-section about medical journeys. It includes a 'Sign Up Now' button and a 'View More' link. To the right is a photograph of three medical professionals in a clinical setting. Below the photo are three icons: 'Education as a lifestyle' (books), 'Physicians' community' (people), and 'Professional presence' (person on a screen). A large Apple logo is visible at the bottom left of the desktop interface.

- Admin can manage users, posts, professions, interests and channels
- Implement search by title and description of the post
- Introduced user permission distribution to ensure safe and secure use of the app by users and prevent any fraud or data thefts

- Completely integrated custom messaging and live messaging feature for communication between users
- All types of posts can be saved and bookmarked
- Laced with mail reminder features and in app notifications to speed up all the processes
- The system keeps related personnel's updated with real time statuses

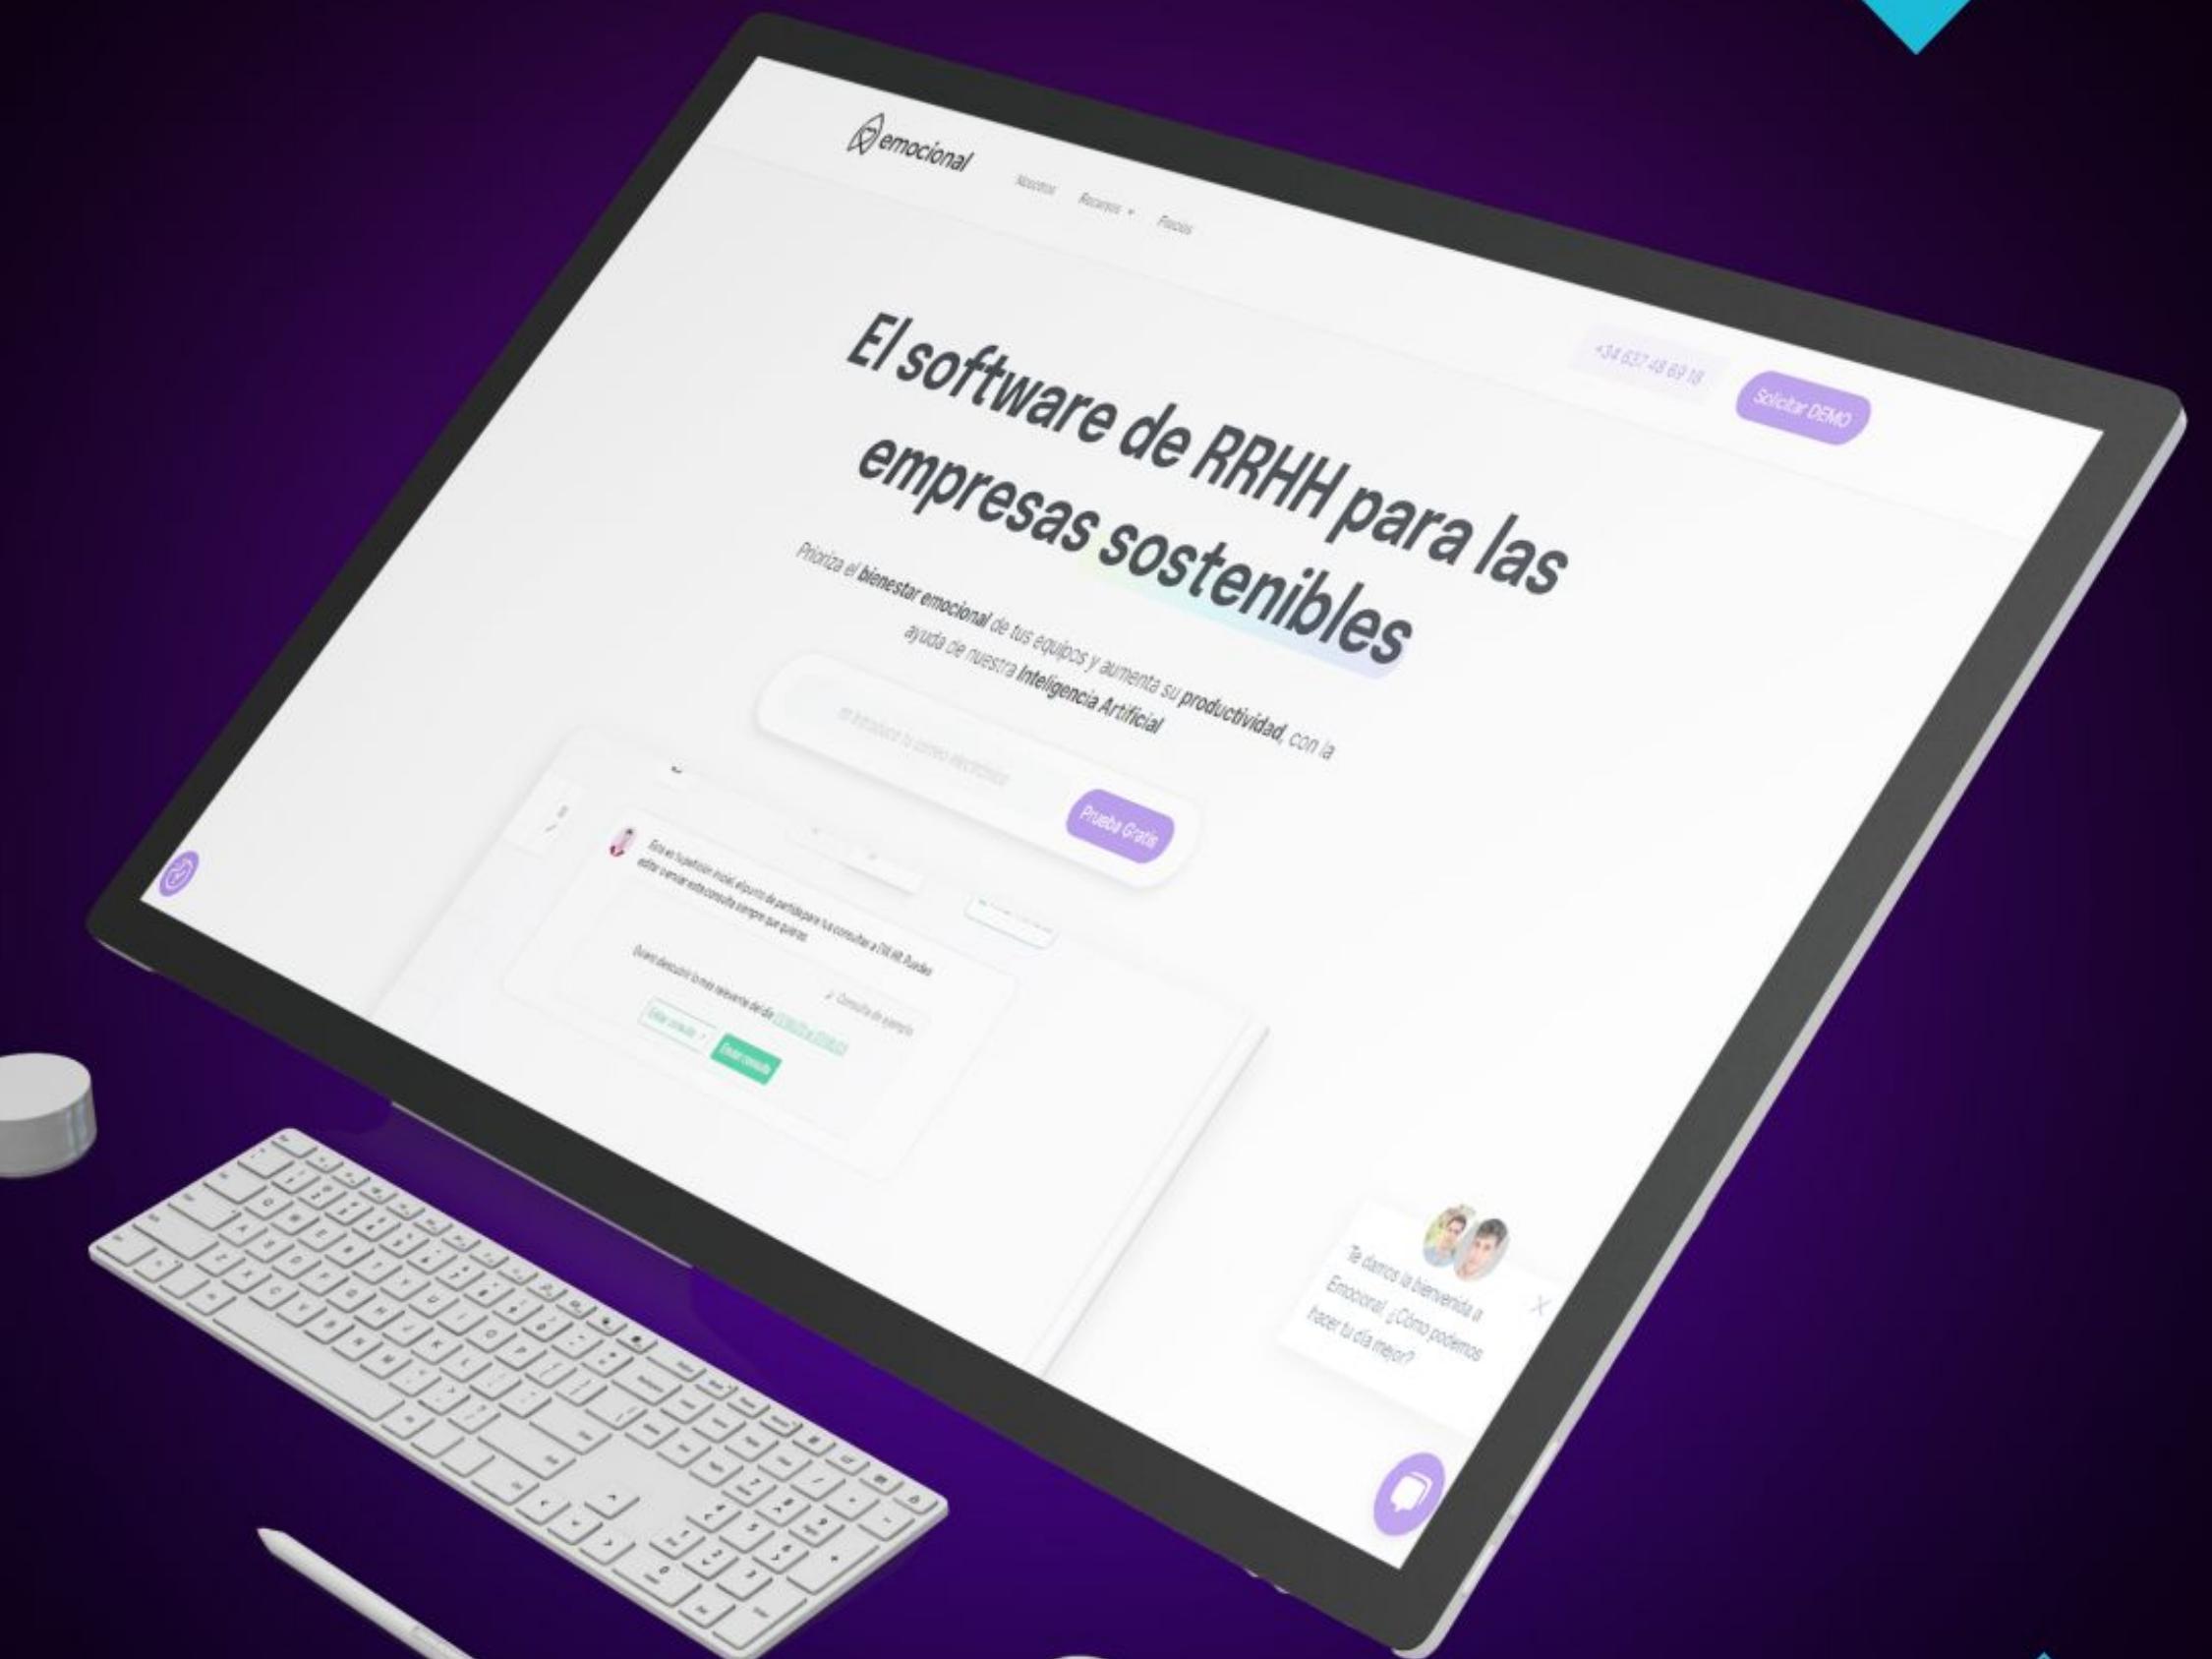

Corporate Emotional Wellness Solutions

CHECKLIST medidas de BIENESTAR en el trabajo
Descubre si tu empresa cumple con los estándares de bienestar en el trabajo. Comprueba qué puedes hacer para mejorar tu entorno de trabajo con 30 preguntas para saber si estás cumpliendo con los criterios de bienestar corporativo. Crea tu checklist ahora mismo y descarga el informe "Guía para el bienestar corporativo".

The screenshot displays the homepage of the emocional website. At the top, there's a navigation bar with links for 'Home', 'Resources', and 'Practice'. The main header is 'El Blog de Emocional'. Below it, a featured post by Abraham López, Co-founder of Correcto, discusses keys to success in the startup world. To the right, there's a sidebar with a purple background containing a search bar and a button labeled 'Enter'.

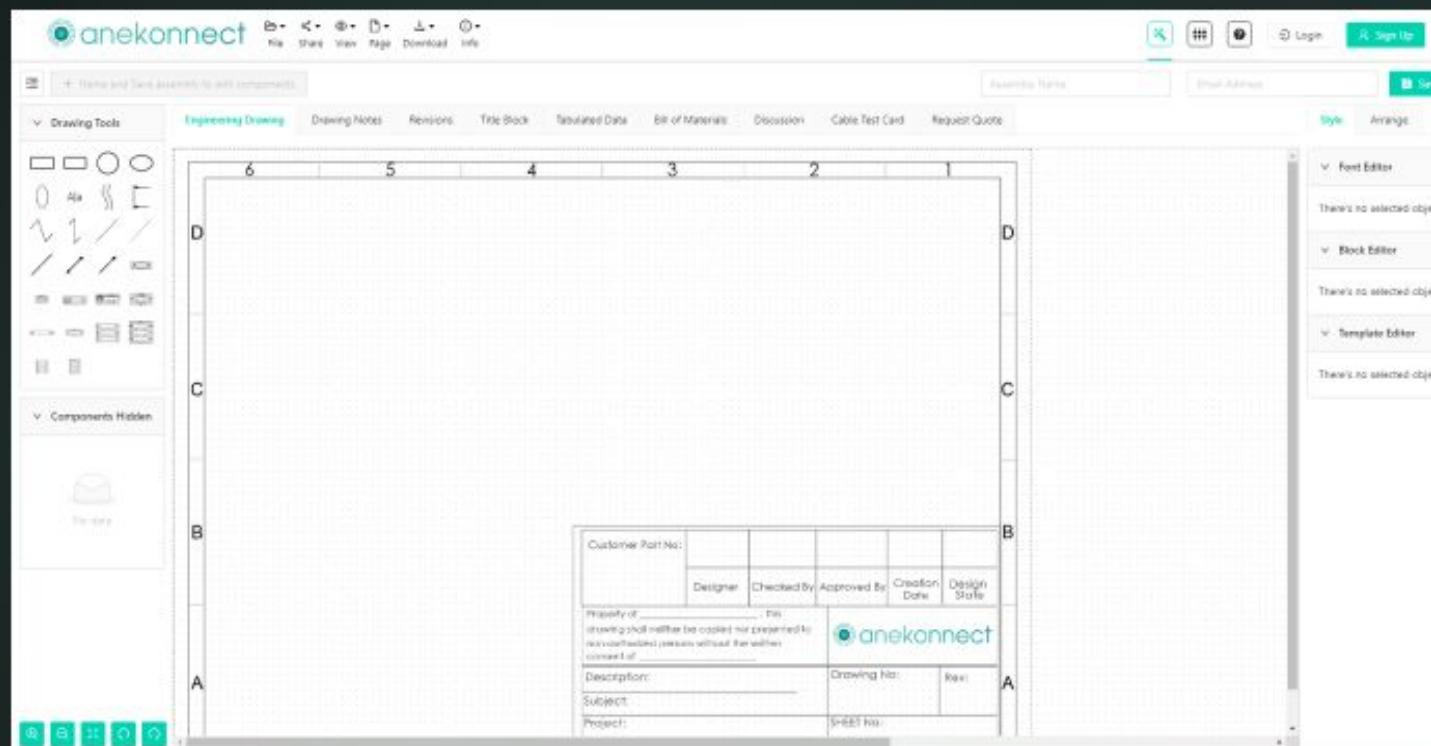

Platform for Assembling Cables

The TechStaunch team has been working to design & build the landing page of the platform as per the requirements. It's an online platform for all cable assembly needs, providing solutions to Cable Designers & Connector Manufacturers.

Technology: React.js, AntDesign

Diagramming application with 10,000+ Subsea Components to draw

Engineering Drawing & Wiring Schemas of Electrical Cables in Subsea Industry

We understand your pain

Diagramming with Office Applications	Diagramming with CAD Software
<ul style="list-style-type: none"> Need to browse PDF Catalogs Copy Paste Images from catalogs to XLS/PPT/Word Countless hours to draw wiring schemas Explain assembly details on emails Difficult to capture cable details in the drawings 	<ul style="list-style-type: none"> Restricted to licenses and need special hardware Need CAD Models and Engineering resources Difficult to draw wiring schemas Minimal sharing and collaboration Expensive and time consuming

Who We Serve

- Survey / ROV Systems**: Receive cables faster to tool up and customize ROV systems.
- Cable Molders**: Provide rapid quotes and build cables error free.
- Component Manufacturers**: Simplify product search & place it product customer drawings.

Our Solution

Anekonnect shortens the time to design, procure and mold subsea cables. Anekonnect tools are built on feedback and experiences shared by survey engineers, ROV builders & operators, cable molders, equipment rental companies and connector manufacturers.

Search, Guided Navigation, & Parametric Filters

Narrow down a component via guided navigation or search by component name or filter a component by its performance parameters. Users are sure to find it faster at Anekonnect than on any manufacturer's PDF catalog or their website. A link to the original datasheet from manufacturer is always available for more details.

Simplicity

Anekonnect is a component library with simple drag-and-drop of components in a browser. We've removed the need for CAD software, & CAD resources to draw cable assemblies. Application enables Sales/BD managers, survey engineers, planners and staff members to create professional cable drawings.

BOM Generation

A cable assembly design would be incomplete, if quotes cannot be generated. Every cable design generates Bill of Material. Download BOM in .csv format for integration with any ERP to support rapid estimation of cable manufacturing costs.

Collaboration during design and drawing

Cable design becomes easier and faster with inputs from manufacturers and cable molders. Traditional technologies offer little help in this matter. Anekonnect is a cloud native application where sharing and collaboration is built in its DNA. Share an assembly, in-application communication on the drawings, design with confidence and build it faster with Anekonnect.

From cable design to cable molding without the hassle.

E-commerce Platform

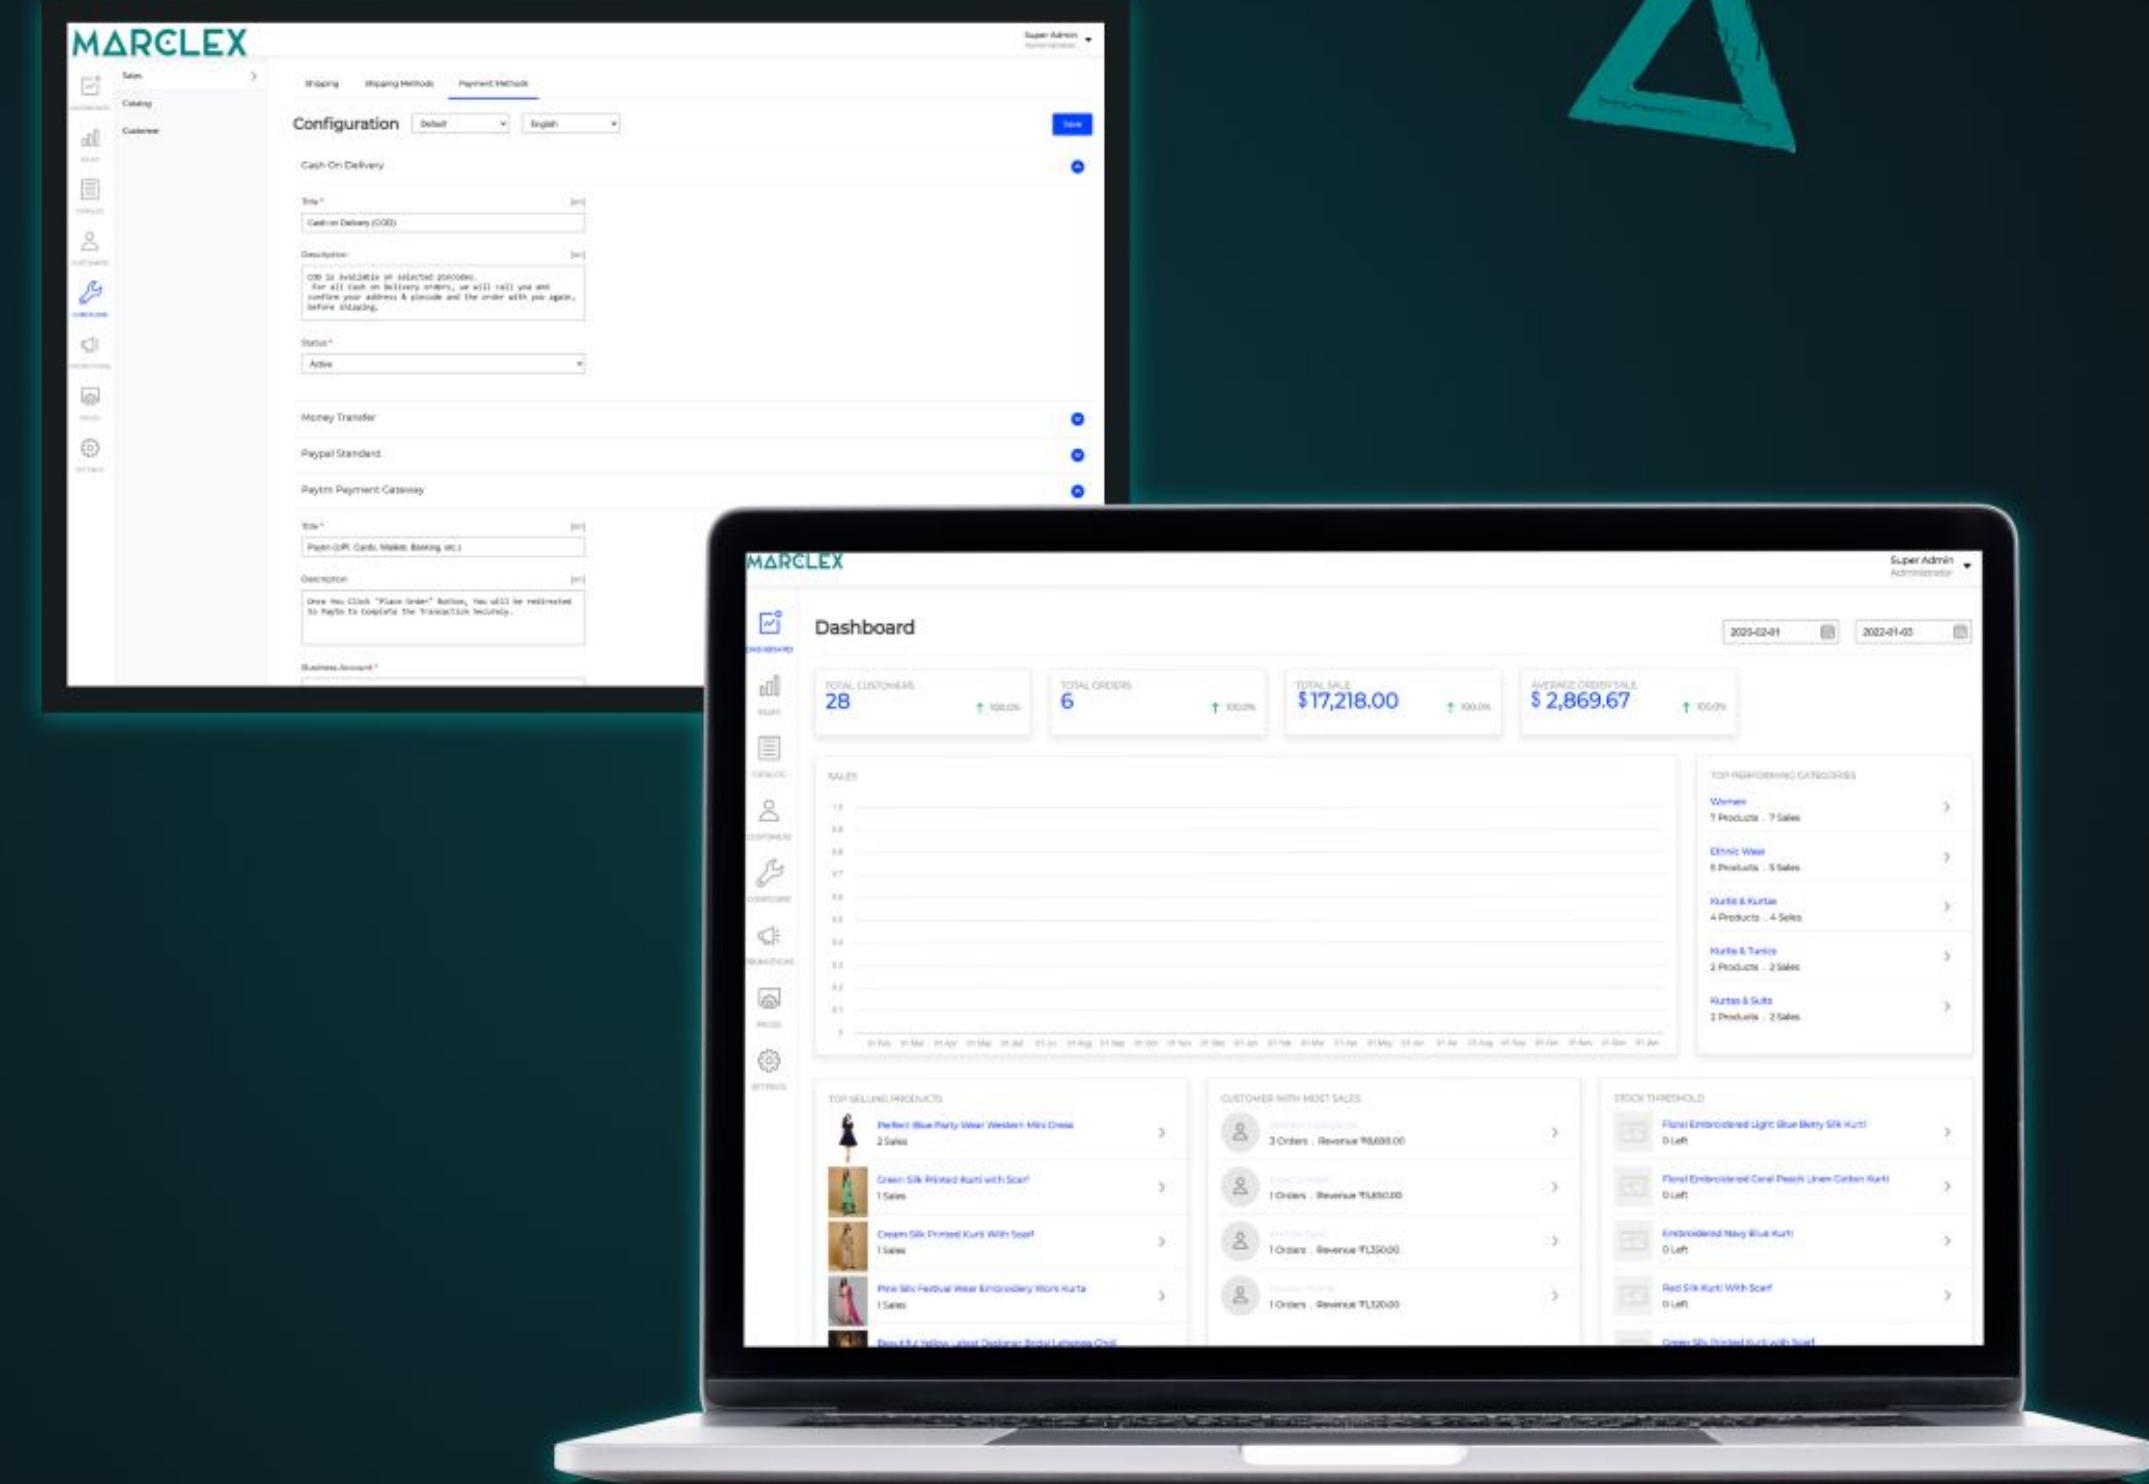

Our client wanted an E-commerce platform to sell uniquely designed wedding dresses online along with the virtual fitting solution. As a result, we delivered a product available for our users and an admin panel to manage products, orders, transactions, etc.

- Built an AI-driven Admin panel with SEO optimized catalogue generations and automated order processing to avoid any human-induced errors and mistakes.

- Built the Admin System where everything can be accessed in just 1 click due to the use of the single database
- Laced with mail reminder features to speed up all the processes, the system keeps related personnel's updated with real-time statuses.
- Role-based authorizations to allow the application usage for different types of users (Accountants, Sales Head, Marketing Team)
- With flexible architecture, Frontend provides a seamless experience to users.
- With flexible architecture, Frontend provides a seamless experience to users.
- Secure payment gateway integrations to ensure free and secure credit card usage

Technology: Laravel, Vue.js

Marketplace for Virtual Events

The mission of fanshakes is to create a single platform for all kind of virtual events. Our main challenge was to develop a user-friendly design that would be convenient for future customers and meet our client's expectations. Being a designer himself, our client had a vision of how the website and app should look to fit the market.

Our developers worked hard on the details to propose solutions that would achieve our client's goal.

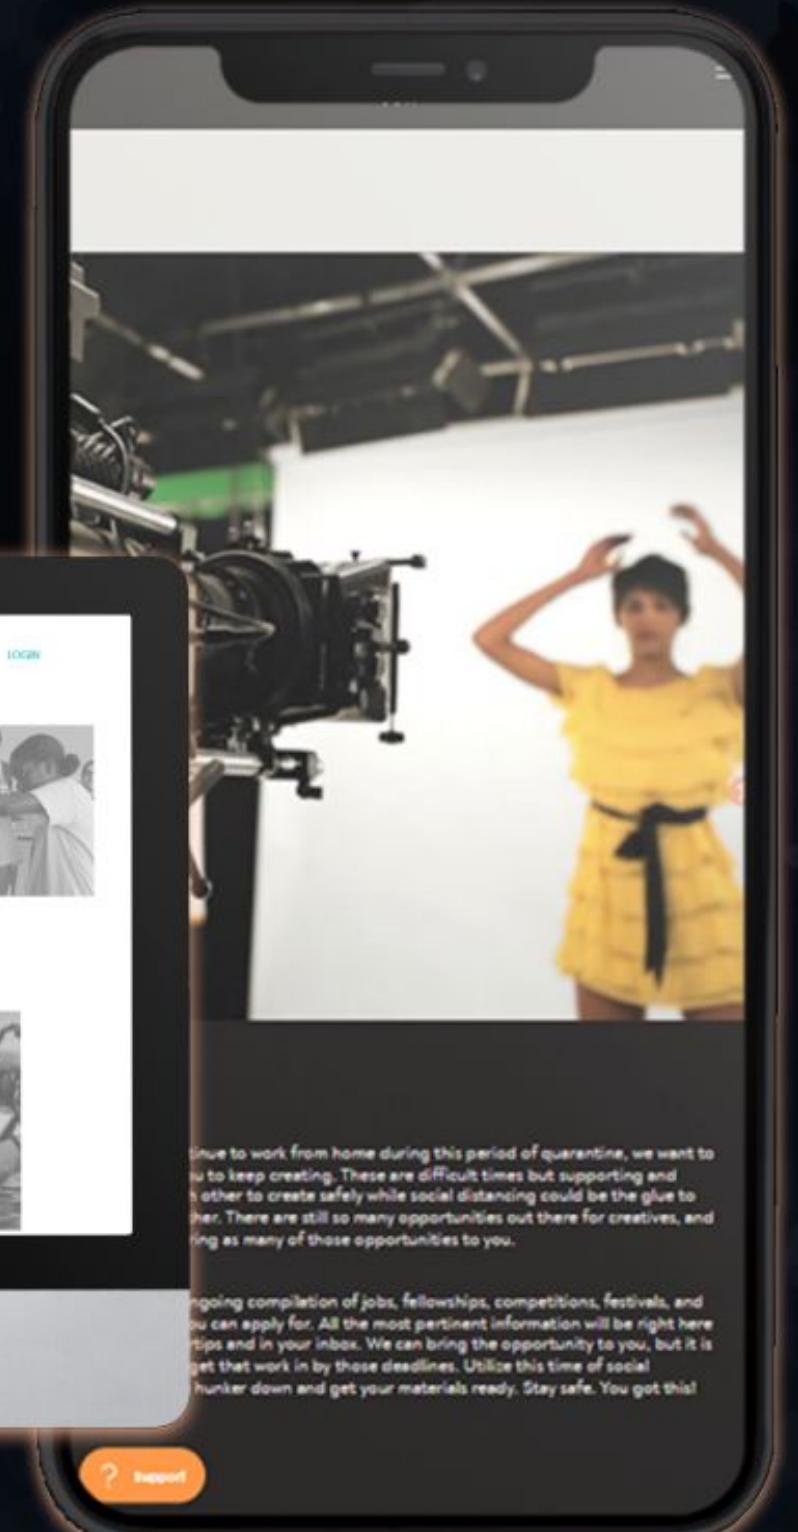

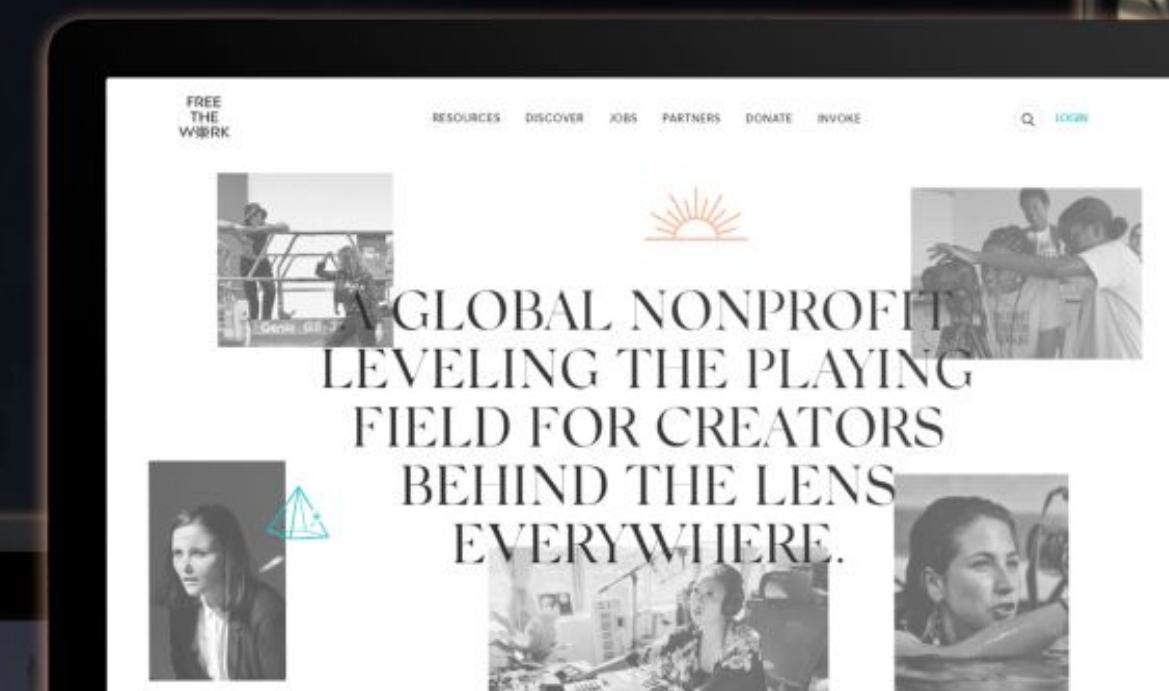

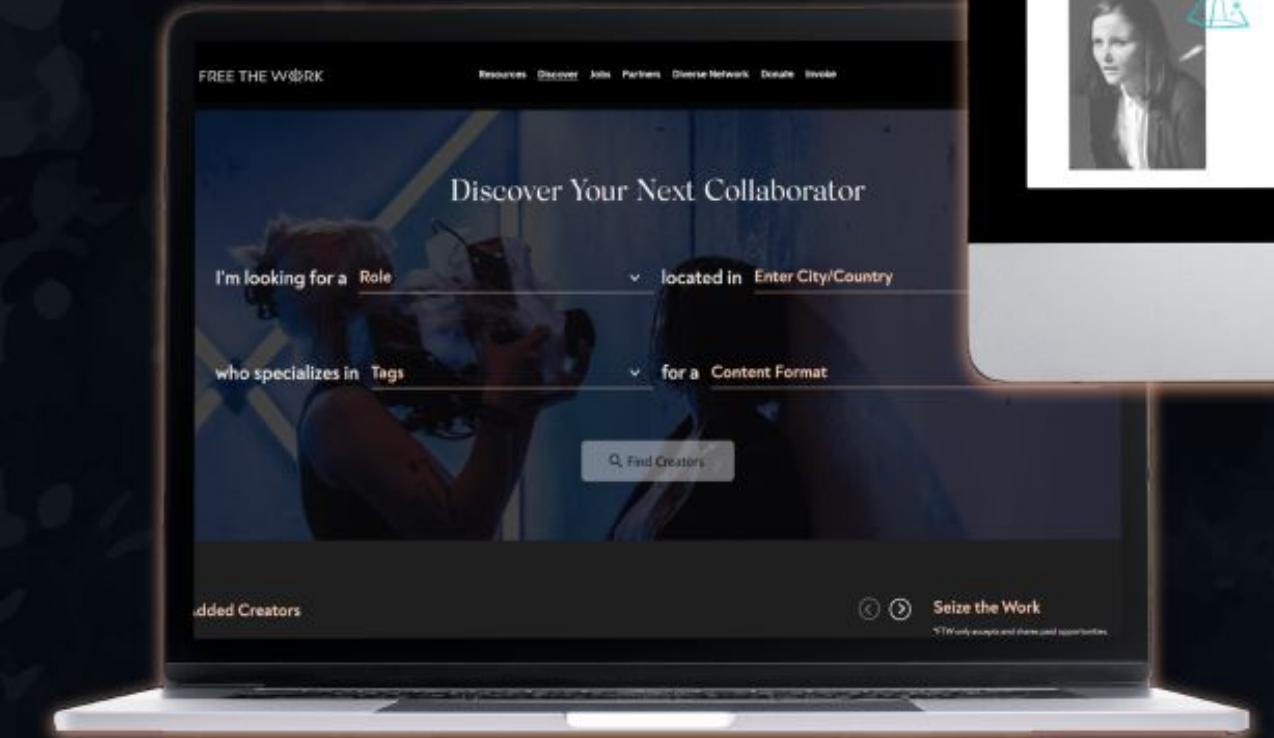

We designed an easy-to-navigate interface for smooth, intuitive and unmatched user satisfaction for virtual events hosting and bookings.

Technology: Vue.js, Vuex, Typescript

FREE THE WORK

Creative Hub for Talent Showcase

- Our client asked us to migrate their entire application database from one platform to another and make the necessary architecture changes to develop a Customized admin panel & develop new functionality & features for the users to improve management and automate onboardings. The task of the TechStaunch team was to create the primary parts of the project, engineering, design, and documentation.

The screenshot shows the FreeTheWork platform's user interface. At the top, there's a navigation bar with links like 'Resources', 'Discover', 'Jobs', 'Diverse Network', 'Partners', 'Donate', and 'Invite'. Below the navigation is a search bar with placeholder text 'Search by Name or Keyword' and a magnifying glass icon. To the right of the search bar is a small orange circle with the number '38' and the word 'Invite'. The main area features a sidebar titled 'Filters:' on the left, which includes sections for 'Badges', 'Creative Role', 'Content Format', 'Tags', 'Location', 'Language', 'Union & Representation', 'Representation', 'Union', 'Premium', 'Ethnicity', 'Gender Identity', and 'Geo & Culture'. The main content area displays a list of users with their profile pictures, names, roles, and counts. For example, 'new filmmaker' is listed under 'November' with a count of 436. Another user, 'november fifteen', is listed under 'November' with a count of 3615. The interface also includes a 'Create Account' button and a 'Sort by' dropdown.

- Rearchitecting the entire stack based on the latest technologies
- Analyzing and re-evaluating MVP
- Implement search by role, location, tags, formats, +20 different filters
- Playlists Projects on the platform
- Mass upload function (up to 10K account invites at a time)
- Complex admin panel (ability to add/update/remove all types of accounts/videos, form playlists, search/filters using elastic search, categorize videos and change their sequence by drag and drop)
- Migrating from the legacy stack to the new one whilst platform was in use
- Introduced user permission distribution to ensure safe and secure use of the app by users and prevent any fraud or data thefts

Technology: React.js, Next.js, Elastic Search, Algolia, Firebase, Contentful

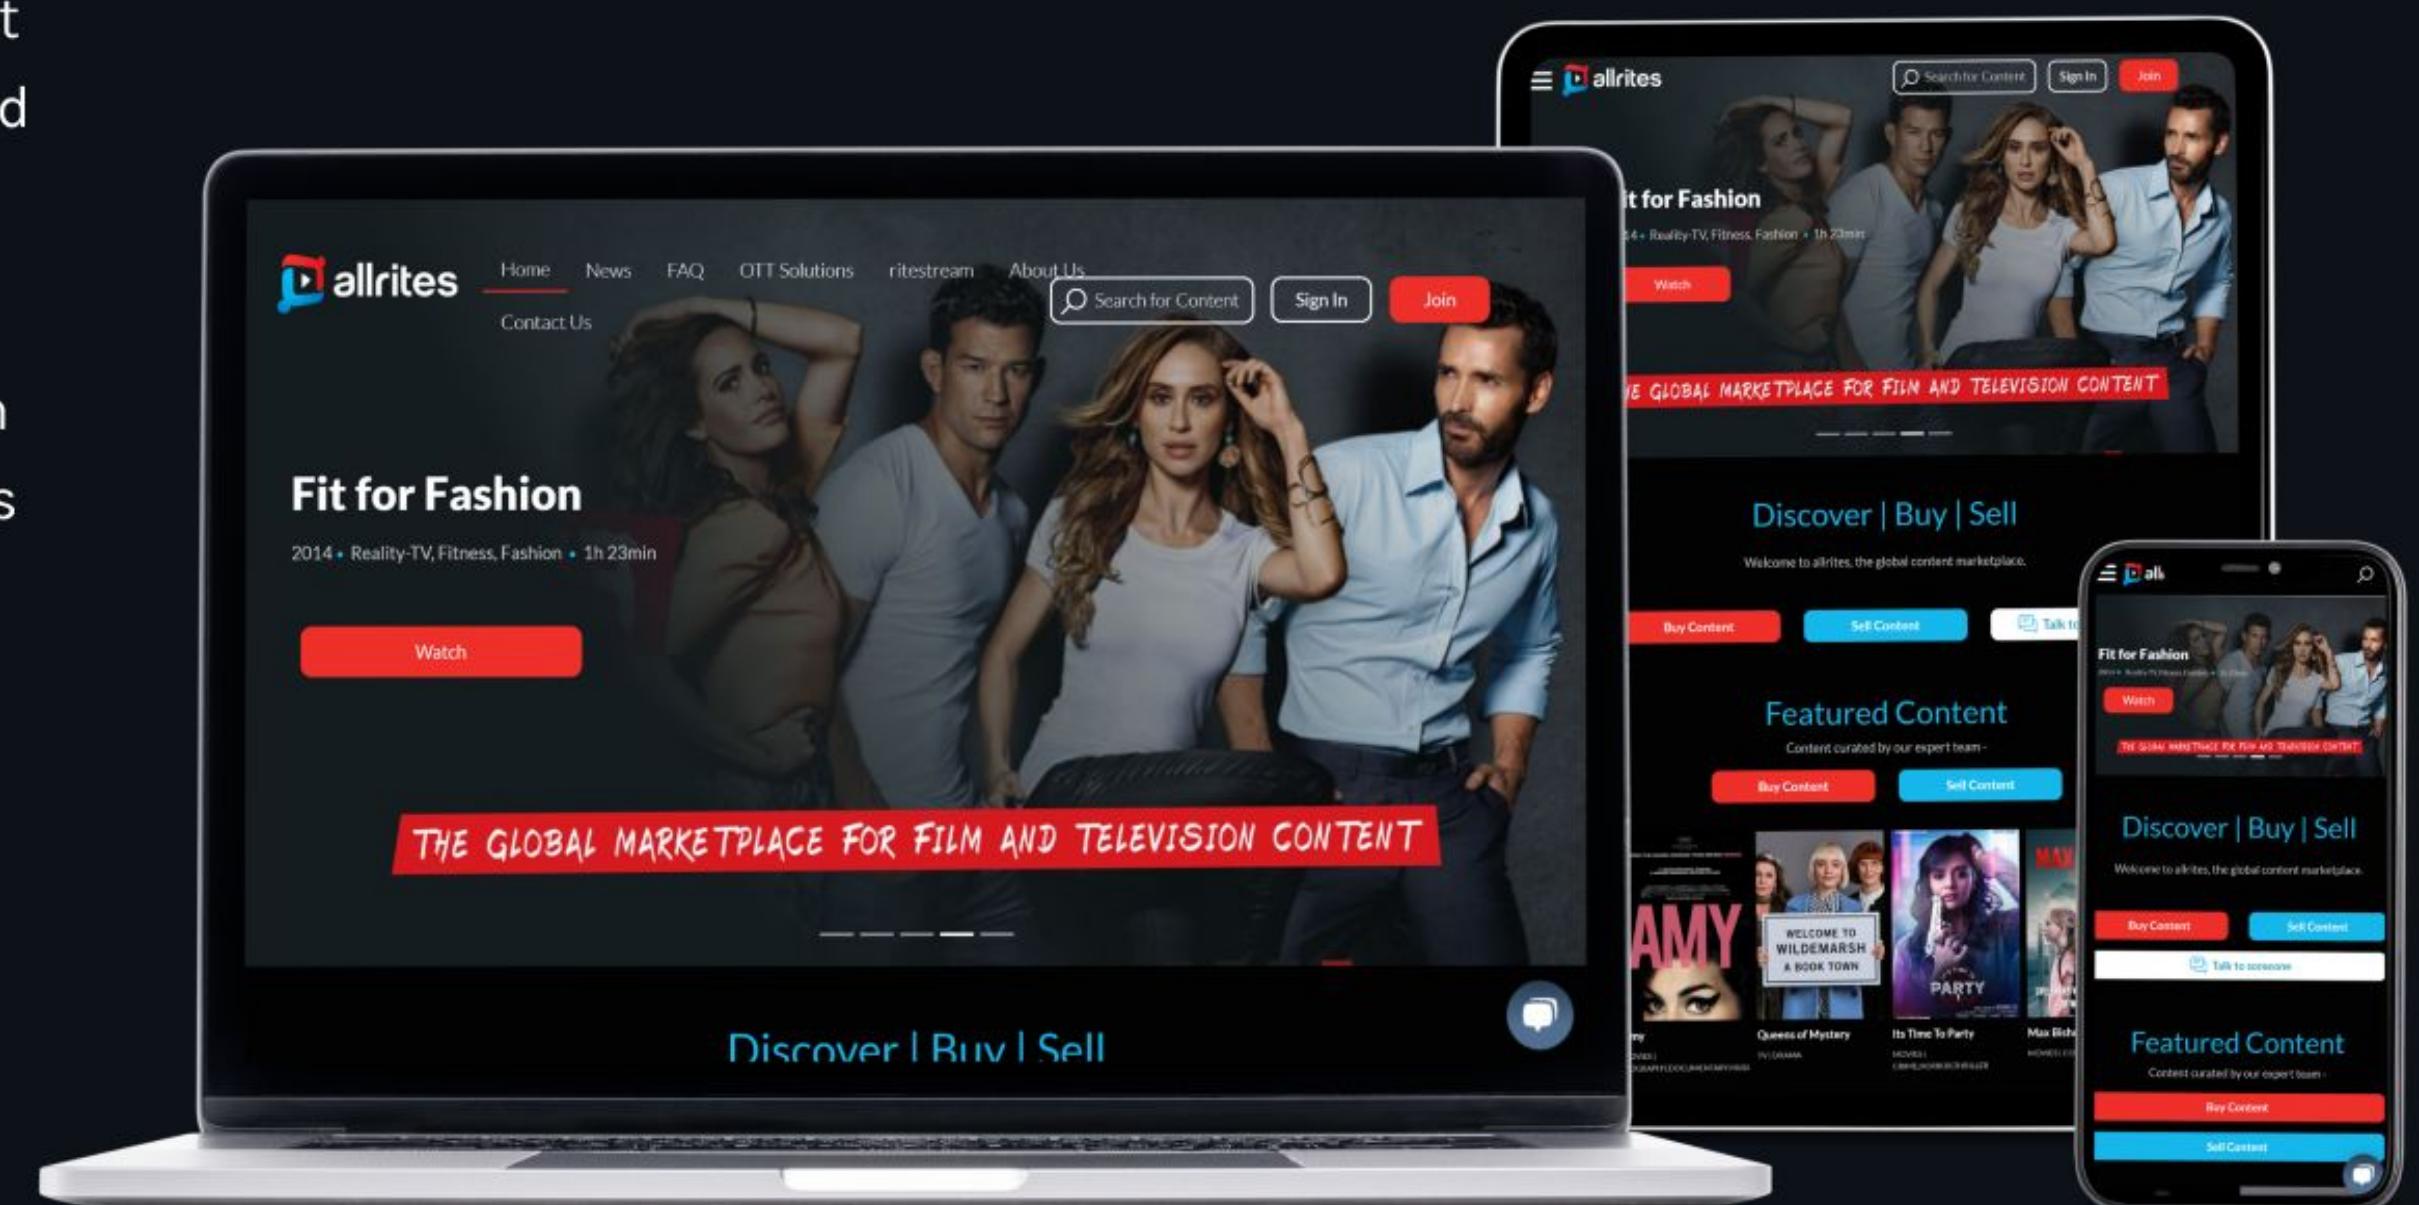

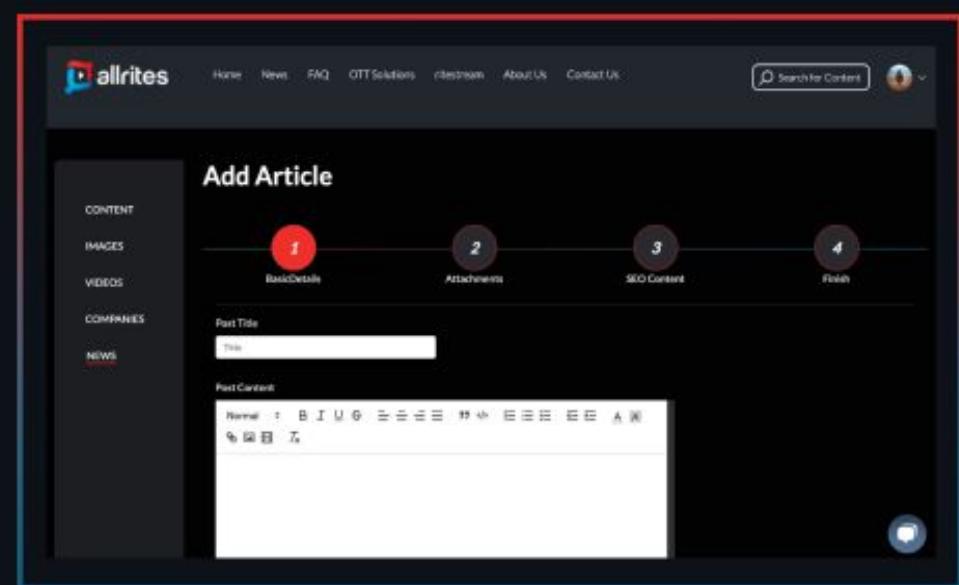

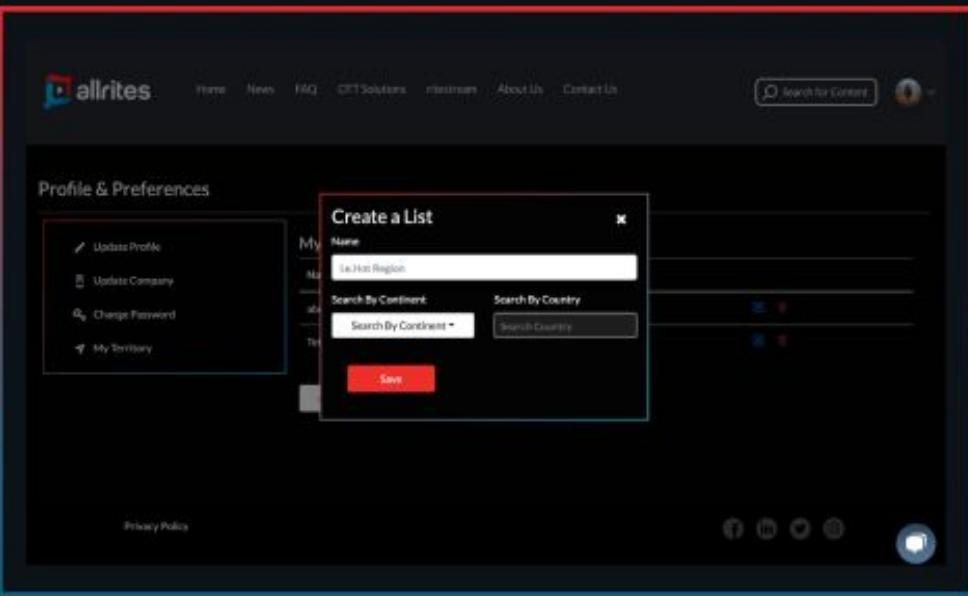

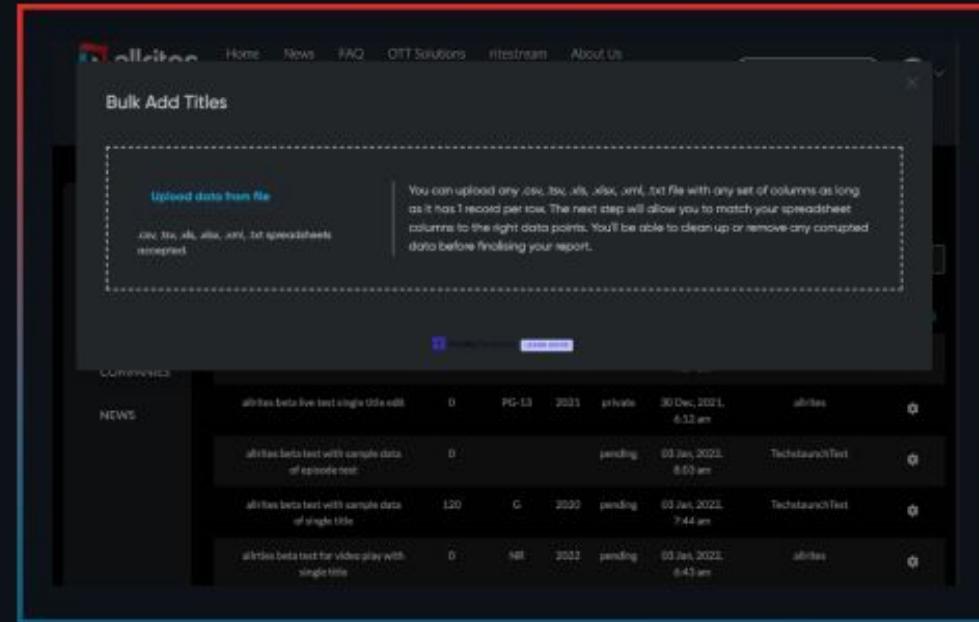

Marketplace for Global Media

allrites is the digital marketplace to discover, buy and sell the best global content

Our client wanted a custom platform for different types of businesses to buy & sell unique licensed content in media and entertainment to various OTG platform.

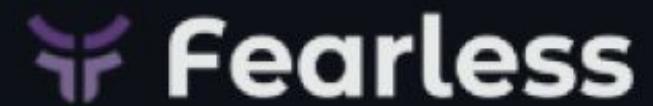

We provided a solution with a customized admin panel & a customer facing application for buyers to search from among 200TB different titles & sellers to keep uploading new licensed data for their users.

- Analyzing and re-evaluating MVP
- Developing an understanding of the entertainment domain
- Performance testing of the microservices under load
- Upload bulk content on the platform(Video movies/Series etc) using frontend or import/exports through excels.
- Creating collections, managing inventories for buyers to purchase content
- Region wise contracts and content licensing for buyers
- Payment reports for sellers and automated payments
- Complex search and filter all across the platforms
- Rearchitecting the entire stack based on the latest technologies
- Migrating from the legacy stack to the new one keeping the platform up & running without any downtime

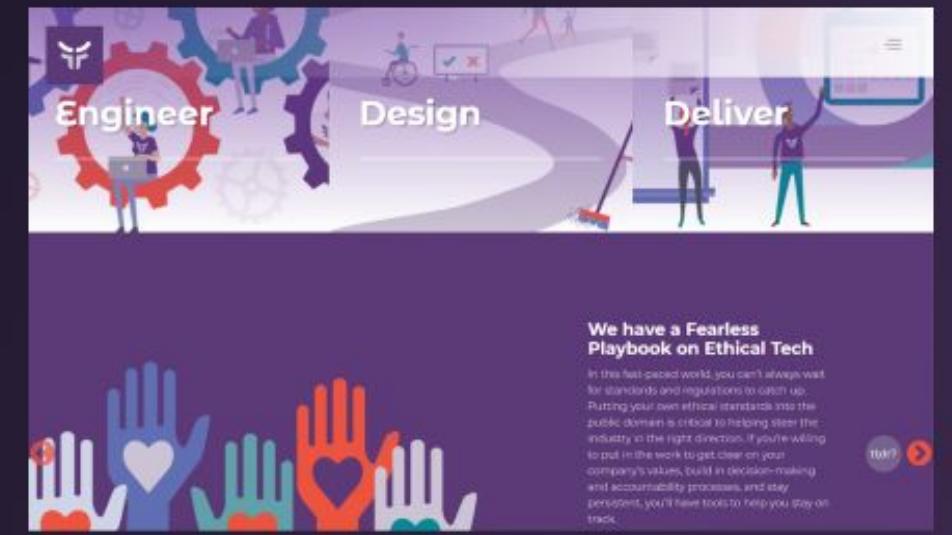

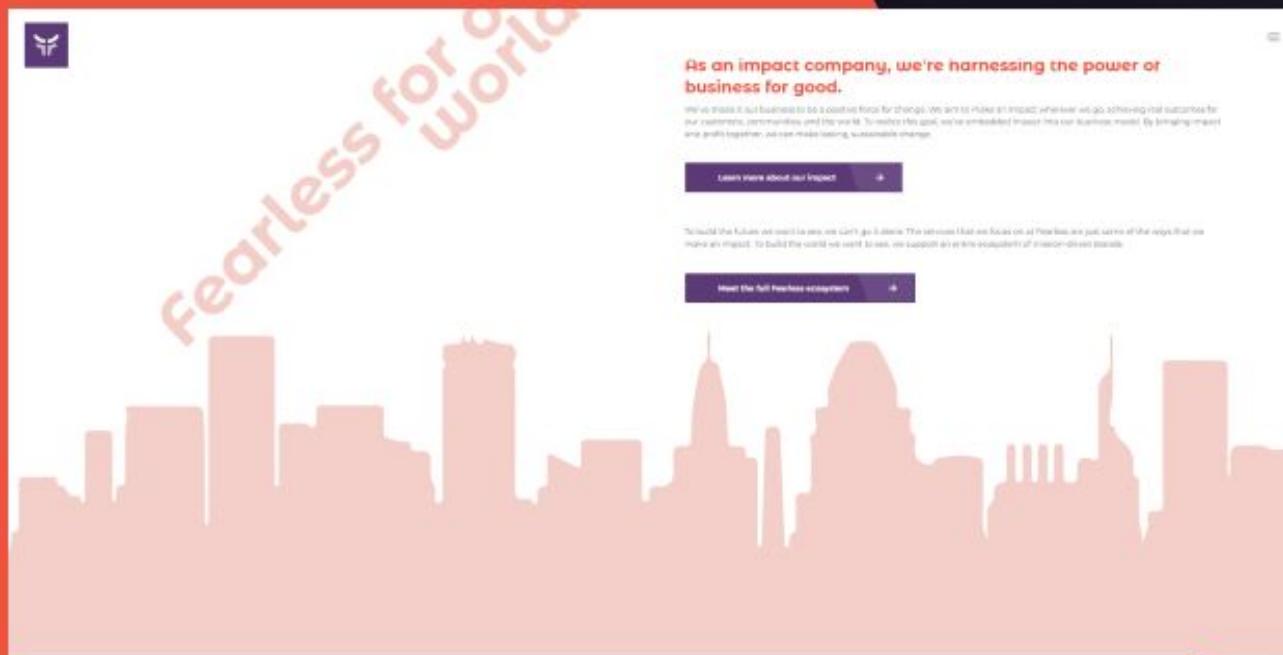

Technology: Nuxt.js Laravel, Algolia, Uppy

Digital Service Integrators

Our client wanted to enhance the website for a better user experience. Our role was to improve the existing UI, upgrade the integrated libraries such as maps, Headless CMS, Social Media Integration etc & improve underlying search/filters functionality along with site optimization.

Technology: Vue.js, Vuex, Headless CMS

Platform for Investment Solutions

- Our client asked us to develop a cross-platform app for stock application along with complex charts integration to show real-time data.
- Integrate different charts in the app.
- Integrate discuss for discussion forum integration.
- Show different stock details in detailed chart view.
- Customize charts from syncfusion library

Technology : Flutter, Syncfusion Chart

Platform for Digital Service Firms

Hutch empowers and connects underrepresented entrepreneurs who build strong, community-focused digital services companies.

Our client wanted to build the entire platform as per the given designs for their users. We completed a fully integrated site for an intensive 24 month program.

Technology : WordPress, Php

Hutch

Grow your digital services company with Hutch

Hutch is a 24-month program that provides underrepresented entrepreneurs with a place to learn by building successful and impactful government digital services firms. The program equips businesses with the tools, mentorship, and peer support they need to thrive in the world of government contracting.

[Learn more](#)

OUR PROGRAM

Building not just successful digital services companies, but impactful ones.

OUR INSTITUTE

Building not just successful digital services companies, but impactful ones.

A blueprint for success.

Our thriving, action-oriented mentors are highly skilled experts each month who have walked the path before. We can't wait to support the program's designed to help our entrepreneurs with the tools and knowledge they need when they need them, leading our cohort companies to deepen and focus their core capabilities.

Personalized support.

We're committed to meeting our entrepreneurs where they're at in their business journeys. Our cohort model is based on the principle of mutual accountability, so while our entrepreneurs have to be 100% committed, our mentors have to provide them with structure and support at every step of their journeys to meet their success.

SUCCESS STORIES

"Anyone who has a passion for doing good, and knowing software and technology can power the better parts of humanity and help the betterment and good of everyone, those are the people that should definitely be applying to the Hutch program."

Emmanuel "Mannie" Insinga

Who can apply?

Hutch is focused on supporting government digital services firms that are dedicated to giving back to their communities. To be eligible for our programs, you must:

- Be a founder:** Your business must be sole or majority owned by one or more underrepresented individuals (including race, ethnicity, gender, sexual orientation, gender identity, and/or disability). Only one person per company can be accepted into the program.
- Be team digital services:** Your business must do work in the digital services space, specifically in the currently expanding field of government contracting. Only one person per company can be accepted into the program.
- Be down for Baltimore:** It must be willing to commit to challenging our research for in-person classes, peer participation, and commitment to giving back.

Be ready to dive deep:

You must be ready to dig deep and actively participate in many sessions, and you must be an empathetic individual who is ready to listen to and learn from others.

“

Caleb Abernathy

TechStaunch Solutions has done a great job. They've really helped us keep our platform up and running.

TechStaunch Solutions is creating a fully functional calendar app, increasing productivity workflow and team planning. They've conducted initial meetings, and messages are sent if changes are needed.

“

Mariano Malisani

Their speed and quality, as well as attention to detail were most impressive.

TechStaunch Solutions developed a virtual reality solution, programming localization of user interfaces. They've also used the Lokalise platform, to launch the software in several languages.

“

Edo Yichie

Quick and efficient. Delivers high quality work.

We had one of the best customer experiences

Reviews

"TechStaunch Solutions has done a great job. They've really helped us keep our platform up and running."

TechStaunch Solutions is upgrading the client's existing platform, which highlights underrepresented creators. The team is now conducting a code clean up and entirely remaking some pieces.

"Their attention to detail and accuracy in creating our vision are outstanding."

TechStaunch has helped an art gallery to code the community and Twitter integration part of their web page. The team has followed the client's requirements and timelines.

"Their speed and quality, as well as attention to detail were most impressive."

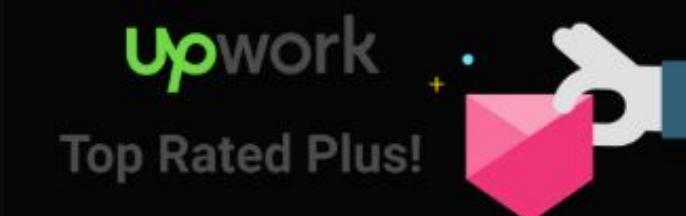

"Their speed and quality, as well as attention to detail were most impressive."

TechStaunch Solutions was tasked with redeveloping the front end of a web-based dental shade matching application. The client hired the vendor for their proven track record and communication skills.

"Their speed and quality, as well as attention to detail were most impressive."

TechStaunch Solutions developed a virtual reality solution, programming localization of user interfaces. They've also used the Localise platform, to launch the software in several languages.

"They were open to major changes we asked for from the initial UX changes."

TechStaunch Solutions provides full-stack site development for a coding course provider for kids. The team creates a landing page, mock APIs for the backend, and ReactJS as a means for other development.
